Why do people read negative Internet comments and do other things that will obviously be painful? Because humans have an inherent need to 1 uncertainty, according to a recent study in Psychological Science. The new research reveals that the need to know is so strong that people will 2 to satisfy their curiosity even when it is clear the answer will 3.

In a series of four experiments, behavioral scientists at the University of Chicago and the Wisconsin School of Business tested. Student's willingness to 4 themselves to unpleasant stimuli in an effort to satisfy curiosity. For one 5 each participant was shown a pile of pens that the researcher claimed were from a previous experiment. The twist? Half of the pens would 6 an electric shock when clicked.

Twenty-seven students were told which pens were electrified, another twenty-seven were told only that some were electrified 7 left alone in the room, the students who did not know which ones would shock them clicked more pens and incurred more shocks than the students who knew what would 8 subsequent experiments reproduced, this effect with other stimuli 9 the sound of finger nails on a chalkboard and photographs of disgusting insects.

The drive to 10 is deeply rooted in humans. Much the same as the basic drives for 11 or shelter, says Christopher Hsee of the University of Chicago Curiosity is often considered a good instinct-it can 12 New Scientific advances, for instance-but sometimes such 13 can backfire, the insight that curiosity can drive you to do 14 things is a profound one.

Unhealthy curiosity is possible to 15, however, in a final experiment, participants who were encouraged to 16 how they would feel after viewing an unpleasant picture were less likely to 17 to see such an image. These results suggest that imagining the 18 of following through

on one's curiosity ahead of time can help determine 19 it is worth the endeavor. Thinking about long-term 20 is key to reducing the possible negative effects of curiosity. Hsee says "in other words, don't read online comments".

|----------------------|----------------------|------------------|--------------------|
| 1. [A] Protect       | [B] resolve          | [C] discuss      | [D] ignore         |
| 2. [A] refuse        | [B] wait             | [C] regret       | [D] seek           |
| 3. [A] hurt          | [B] last             | [C] mislead      | [D] rise           |
| 4. [A] alert         | [B] tie              | [C] treat        | [D] expose         |
| 5. [A] message       | [B] review           | [C] trial        | [D] concept        |
| 6. [A] remove        | [B] weaken           | [C] interrupt    | [D] deliver        |
| 7. [A] when          | [B] if               | [C] though       | [D] unless         |
| 8. [A] continue      | [B] happen           | [C] disappear    | [D] change         |
| 9. [A] rather than   | [B] regardless of    | [C] such as      | [D] owing to       |
| 10. [A] discover     | [B] forgive          | [C] forget       | [D] disagree       |
| 11. [A] pay          | [B] marriage         | [C] schooling    | [D] food           |
| 12. [A] lead to      | [B] rest on          | [C] learn from   | [D] begin with     |
| 13. [A] withdrawal   | [B] persistence      | [C] inquiry      | [D] diligence      |
| 14. [A] self-reliant | [B] self-destructive | [C] self-evident | [D] self-deceptive |
| 15. [A] define       | [B] resist           | [C] replace      | [D] trace          |
| 16. [A] overlook     | [B] predict          | [C] design       | [D] conceal        |
| 17. [A] remember     | [B] promise          | [C] choose       | [D] pretend        |
| 18. [A] relief       | [B] plan             | [C] duty         | [D] outcome        |
| 19. [A] why          | [B] whether          | [C] where        | [D] how            |
| 20. [A] consequences | [B] investments      | [C] strategies   | [D] limitations    |

## Section II Reading Comprehension

### Part A

#### Directions:

Read the following four texts. Answer the questions below each text by choosing A, B, C or D. Mark your answers on the ANSWER SHEET. (40 points)

## Text 1

It is curious that Stephen Koziatek feels almost asthough he has to justify his efforts to give his students a better future.

Mr. Koziatek is part of something pioneering. He is a teacher at a New Hampshire high school where learning is not something of books and tests and mechanical memorization, but practical. When did it become accepted wisdom that students should be able to name the 13th president of the United States but be utterly overwhelmed by a broken bike chain?

As Koziatek knows, there is learning in just about everything. Nothing is necessarilygained by forcing students to learn geometry at a graffiti-ed desk stuck with generations of discarded chewing gum. They can also learn geometry by assembling a bicycle.

But he's also found a kind of insidious prejudice. Working with your hands is seen asalmost a mark of inferiority. Schools in the family of vocational education "have that stereotype...that it's for kids who can't make it academically,"he says.

On one hand, that viewpoint is a logical product of America's evolution. Manufacturing is not the economic engine that it once was. The job security that the US economy once offered to high school graduates has largely evaporated. More education is the new principle. We want more for our kids, and rightfully so.

But the headlong push into bachelor'sdegrees for all - and the subtle devaluing of anything less - misses an important point: That's not the only thing the American economy need. Yes, a bachelor's degree opens more doors. But even now, 54 percent of the jobs in the country are middle-skill jobs, such as construction and high-skill manufacturing. But only 44 percent of workers are adequately trained.

In other words, at a time when the working class has turned the country on its political head, frustrated that the opportunity that once defined America is vanishing, one obvious solution is staring us in the face. There is a gap in working-class jobs, but the workers who need those jobs most aren't equipped to do them. Koziatek's Manchester school of Technology High School is trying to fill that gap.

Koziatek's school is a wake-up call. When education becomes one-size-fits-all, it risks overlooking a nation's diversity of gifts.

**21. A broken bike chain is mentioned to show students' lack of .**

[ A ] practical ability

[ B ] academic training

[ C ] pioneering spirit

[ D ] mechanical memorization

22. There exists the prejudice that vocational education is for kids who.

- [ A ] have a stereotyped mind
- [ B ] have no career motivation
- [ C ] are not academically successful
- [ D ] are financially disadvantaged

23. We can infer from Paragraph 5 that high school graduates.

- [ A ] used to have big financial concerns
- [ B ] used to have more job opportunities
- [ C ] are reluctant to work in manufacturing
- [ D ] are entitled to more educational privileges

24. The headlong push into bachelor's degrees for all.

- [ A ] helps create a lot of middle-skill jobs
- [ B ] may narrow the gap in working-class jobs
- [ C ] is expected to yield a better-trained workforce
- [ D ] indicates the overvaluing of higher education

25. The author's attitude toward Koziatek's school can be described as.

- [ A ] supportive
- [ B ] tolerant
- [ C ] disappointed
- [ D ] cautious

## Text 2

While fossil fuels – still generate roughly 85 percent of the world's energy supply, it's clearer than ever that the future belongs to renewable sources such as wind and solar. The move to renewable is picking up momentum around the world; They now account for more than half of new power sources going on line.

Some growth stems from a commitment by governments and farsighted businesses to fund cleaner energy sources. But increasingly the story is about the plummeting prices of renewable, especially wind and solar. The cost of solar panels has dropped by 80 percent and the cost of wind turbines by close to one-third in the past eight years.

In many parts of the world renewable energy is already a principal energy source. In Scotland, for example, wind turbines provide enough electricity to power 95 percent of homes. While the rest of the world takes the lead, notably China and Europe, the United States is also seeing a remarkable shift. In March, for the first time, wind and solar power accounted for more than 10 percent of the power generated in the US, reported the US Energy Information Administration.

President Trump has underlined fossil fuels – especially coal – as the path to economic growth. In a recent speech in Iowa, he dismissed wind power as an unreliable energy source. But that message did not play well with many in Iowa, where wind turbines dot the fields and provide 36 percent of the state’s electricity generation – and where tech giants like Microsoft are being attracted by the availability of clean energy to power their data centers.

The question “What happens when the wind doesn’t blow or the sun doesn’t shine?” has provided a quick put-down for skeptics. But a boost in the storage capacity of batteries is making their ability to keep power flowing around the clock more likely.

The advance is driven in part by vehicle manufacturers, who are placing big bets on battery-powered electric vehicles. Although electric cars are still a rarity on roads now, this massive investment could change the picture rapidly in coming years.

While there’s a long way to go, the trend lines for renewable are spiking. The pace of change in energy sources appears to be speeding up – perhaps just in time to have a meaningful effect in slowing climate change. What Washington does – or doesn’t do – to promote alternative energy may mean less and less at a time of a global shift in thought.

**26. The word “plummeting” (Line 3, Para. 2) is closest in meaning to.**

- |                   |                |
|-------------------|----------------|
| [ A ] stabilizing | [ B ] changing |
| [ C ] falling     | [ D ] rising   |

**27. According to Paragraph 3, the use of renewable energy in America.**

- |                              |                                    |
|------------------------------|------------------------------------|
| [ A ] is progressing notably | [ B ] is as extensive as in Europe |
| [ C ] faces many challenges  | [ D ] has proved to be impractical |

**28. It can be learned that in Iowa.**

- [ A ] wind is a widely used energy source
- [ B ] wind energy has replaced fossil fuels
- [ C ] tech giants are investing in clean energy
- [ D ] there is a shortage of clean energy supply

**29. Which of the following is true about clean energy according to Paragraphs 5&6?**

- [ A ] Its application has boosted battery storage.
- [ B ] It is commonly used in car manufacturing.
- [ C ] Its continuous supply is becoming a reality.
- [ D ] Its sustainable exploitation will remain difficult.

30. It can be inferred from the last paragraph that renewable energy \_\_\_\_\_.

- [ A ] will bring the USA closer to other countries.
- [ B ] will accelerate global environmental change.
- [ C ] is not really encouraged by the USA government.
- [ D ] is not competitive enough with regard to its cost.

### Text 3

The power and ambition of the giants of the digital economy is astonishing-Amazon has just announced the purchase of the upmarket grocery chain Whole Foods for \$ 13.5bn, but two years ago Facebook paid even more than that to acquire the Whats-app messaging service, which doesn't have any physical product at all. What Whats-app offered Facebook was an intricate and finely detailed web of its users' friendships and social lives.

Facebook promised the European commission then that it would not link phone numbers to Facebook identities, but it broke the promise almost as soon as the deal went through. Even without knowing what was in the messages, the knowledge of who sent them and to whom was enormously revealing and still could be. What political journalist, what party whip, would not want to know the makeup of the Whats-app groups in which Theresa May's enemies are currently plotting? It may be that the value of Whole Foods to Amazon is not so much the 460 shops it owns, but the records of which customers have purchased what.

Competition law appears to be the only way to address these imbalances of power. But it is clumsy. For one thing, it is very slow compared to the pace of Change within the digital economy. By the time a problem has been addressed and remedied it may have vanished in the marketplace, to be replaced by new abuses of power. But there is a deeper conceptual problem, too. Competition law as presently interpreted deals with financial disadvantage to consumers and this is not obvious when the users of these services don't pay for them. The users of their Services are not their customers. That would be the people who buy advertising from them-and Facebook and Google, the two virtual giants, dominate digital advertising to the disadvantage of all other media and entertainment companies.

The product they're selling is data, and we, the users, convert our lives to date for the benefit of the digital giants. Just as some ants farm the bugs called aphids for the honeydew the produce when they feed, so Google farms us for the data that our digital lives yield. Ants keep predatory insects away from where their aphids feed; Gmail keeps the spam-me out of our inboxes. It doesn't feel like a hu-

man or democratic relationship, even if both sides benefit.

**31. According to Paragraph 1, Facebook acquired WhatsApp for its.**

- [ A ] digital products
- [ B ] user information
- [ C ] physical assets
- [ D ] quality service

**32. Linking phone numbers to Facebook identities may.**

- [ A ] worsen political disputes
- [ B ] mess up customer records
- [ C ] pose a risk to Facebook users
- [ D ] mislead the European commission

**33. According to the author, competition law.**

- [ A ] should sever the new market powers
- [ B ] may worsen the economic imbalance
- [ C ] should not provide just one legal solution
- [ D ] cannot keep pace with the changing market

**34. Competition law as presently interpreted can hardly protect Facebook users because.**

- [ A ] they are not defined as customers
- [ B ] they are not financially reliable
- [ C ] the services are generally digital
- [ D ] the services are paid for by advertisers

**35. The ants analogy is used to illustrate.**

- [ A ] a win-win business model between digital giants
- [ B ] a typical competition pattern among digital giants
- [ C ] the benefits provided for digital giants' customers
- [ D ] the relationship between digital giants and their users

**Text 4**

To combat the trap of putting a premium on being busy, Cal Newport, author of *Deep Work: Rules for Focused Success in a Distracted World*, recommends building a habit of “deep work”-the ability to focus without distraction.

There are a number of approaches to mastering the art of deep work- be it lengthy retreats dedicated to a specific task; developing a daily ritual; or taking a “journalistic” approach to seizing moment of deep work when you can throughout the day. Whichever approach, the key is to determine

your length of focus time and stick to it.

Newport also recommends “deep scheduling” to combat constant interruptions and get more done in less time. “At any given point, I should have deep work scheduled for roughly the next month. Once on the calendar, I protect this time like I would a doctor’s appointment or important meeting”, he writes.

Another approach to getting more done in less time is to rethink how you priorities your day – in particular how we craft our to-do lists. Tim Harford, author of *Messy: The Power of Disorder to Transform Our Lives*, points to a study in the early 1980s that divided undergraduates into two groups; some were advised to set out monthly goals and study activities; others were told to plan activities and goals in much more detail, day by day.

While the researchers assumed that the well-structured daily plans would be most effective when it came to the execution of tasks, they were wrong; the detailed daily plans demotivated students. Harford argues that inevitable distractions often render the daily to-do list ineffective, while leaving room for improvisation in such a list can reap the best results.

In order to make the most of our focus and energy, we also need to embrace downtime, or as Newport suggests, “be lazy”.

“Idleness is not just a vacation, an indulgence or a vice; it is as indispensable to the brain as vitamin D is to the body ...” [idleness] is, paradoxically, necessary to getting any work done,” he argues.

Srini Pillay, an assistant professor of psychiatry at Harvard Medical School, believes this counter intuitive link between downtime and productivity may be due to the way our brains operate. When our brains switch between being focused and unfocused on a task, they tend to be more efficient.

“What people don’t realise is that in order to complete these tasks they need to use both the focus and unfocus circuits in their brain,” says Pillay.

**36. The key to mastering the art of deep work is to.**

- [A] keep to your focus time
- [B] list your immediate tasks
- [C] make specific daily plans
- [D] seize every minute to work

**37. The study in the early 1980s cited by Harford shows that.**

- [A] distractions may actually increase efficiency.
- [B] daily schedules are indispensable to studying

- [ C ] students are hardly motivated by monthly goals
- [ D ] detailed plans may not be as fruitful as expected

**38. According to Newport, idleness is.**

- [ A ] a desirable mental state for busy people.
- [ B ] a major contributor to physical health
- [ C ] an effective way to save time and energy
- [ D ] an essential factor in accomplishing any work

**39. Pillay believes that our brains' shift between being focused and unfocused.**

- [ A ] can result in psychological well-being
- [ B ] can bring about greater efficiency
- [ C ] is aimed at better balance in work
- [ D ] is driven by task urgency

**40. This text is mainly about.**

- [ A ] ways to relieve the tension of busy life
- [ B ] approaches to getting more done in less time
- [ C ] the key to eliminating distractions
- [ D ] the cause of the lack of focus time

**Part B**

**Directions:**

Read the following text and answer the questions by choosing the most suitable subtitles from the list A-G for each numbered paragraph (41-45). There are two extra subtitles which you do not need to use. Mark your answers on the ANSWER SHEET. (10 points)

- A. Just say it
- B. Be present
- C. Pay a unique compliment
- D. Name, places, things
- E. Find the "me too"s
- F. Skip the small talk
- G. Ask for an opinion

Five ways to make conversation with anyone

Conversations are links, which means when you have a conversation with a new person a link gets formed and every conversation you have after that moment will strengthen the link.

You meet new people every day: the grocery worker, the cab driver, new people at work or the security guard at the door. Simply starting a conversation with them will form a link.

Here are five simple ways that you can make the first move and start a conversation with strangers.

41. \_\_\_\_\_

Suppose you are in a room with someone you don't know and something within you says "I want to talk with this person"-this is something that mostly happens with all of us. You wanted to say something-the first word - but it just won't come out, it feels like it is stuck somewhere. I know the feeling and here is my advice: just get it out.

Just think: what is the worst that could happen? They won't talk with you? Well, they are not talking with you now!

I truly believe that once you get that first word out everything else will just flow. So keep it simple: "Hi", "Hey" or "Hello" - do the best you can to gather all of the enthusiasm and energy you can, put on a big smile and say "Hi".

42. \_\_\_\_\_

It is a problem all of us face; you have limited time with the person that you want to talk with and you want to make this talk memorable.

Honestly, if we got stuck in the result of "hi", "hello", "how are you?" and "what is going on?", you will fail to give the initial jolt to the conversation that can make it so memorable.

So don't be afraid to ask more personal questions. Trust me, you'll be surprised to see how much people are willing to share if you just ask.

43. \_\_\_\_\_

When you meet a person for the first time, make an effort to find the things which you and that person have in common so that you can build the conversation from that point. When you start conversation from there and then move outwards, you'll find all of a sudden that the conversation becomes a lot easier.

44. \_\_\_\_\_

Imagine you are pouring your heart out to someone and they are just busy on their phone, and if you ask for their attention you get the response "I can multitask".

So when someone tries to communicate with you, just be in that communication

wholeheartedly. Mike eye contact. Trust me, eye contact is where all the magic happens. When you make eye contact, you can feel the conversation.

45. \_\_\_\_\_

You all came into a conversation where you first met the person, but after some time you may have met again and have forgotten their name. Isn't that awkward!

So, remember the little details of the people you met or you talked with; perhaps the places they have been to, the places they want to go, the things they like, the things they hate - whatever you talk about.

When you remember such things you can automatically become investor in their wellbeing.

So they feel a responsibility to you to keep that relationship going.

That's it. Five amazing ways that you can make conversation with almost anyone. Every person is a really good book to read, or to have a conversation with!

### Section III Translation

#### 46. Directions:

Translate the following text into Chinese. Write your translation neatly on the ANSWER SHEET. (15 points)

A fifth grader gets a homework assignment to select his future career path from a list of occupations. He ticks "astronaut", but quickly adds "scientist" to the list and selects it as well. The boy is convinced that if he reads enough, he can explore as many career paths as he likes. And so he reads everything from encyclopedias to science fiction novels. He reads so passionately that his parents have to institute a "no reading policy" at the dinner table.

That boy was Bill Gates, and he hasn't stopped reading yet – not even after becoming one of the most successful people on the planet. Nowadays, his reading material has changed from science fiction and reference books recently, he revealed that he reads at least 50 nonfiction books a year. Gates chooses nonfiction titles because they explain how the world works. "Each book opens up new avenues of knowledge," Gates says.

## Section IV Writing

### Part A

47. **Directions:** Suppose you have to cancel your travel plan and will not be able to visit professor Smith, write him an email to

- 1) apologize and explain the situation and suggest a future meeting.
- 2) You should write about 100 words on the ANSWER SHEET.

**Do not** use your own name; Use “Li Ming” instead.

**Do not** write your address (10 points).

### Part B

48. **Directions:** Write an essay based on the chart below. In your writing, you should

- 1) interpret the chart, and
- 2) give your comments

You should write about 150 words on the ANSWER SHEET. (15 points)

2017 年某市消费者选择餐厅时的关注因素

## 2017 年全国硕士研究生入学统一考试英语(二)试题

### Section I Use of English

Read the following text. Choose the best word (s) for each numbered blank and mark A, B, C or D on the ANSWER SHEET. (10 points)

People have speculated for centuries about a future without work. Today is no different, with academics, writers, and activists once again 1 that technology is replacing human workers. Some imagine that the coming work-free world will be defined by 2. A few wealthy people will own all the capital, and the masses will struggle in an impoverished wasteland.

A different and not mutually exclusive 3 holds that the future will be a wasteland of a different sort, one 4 by purposelessness: Without jobs to give their lives 5, people will simply become lazy and depressed. 6 today's unemployed don't seem to be having a great time. One Gallup poll found that 20 percent of Americans who have been unemployed for at least a year report having depression, double the rate for 7 Americans. Also, some research suggests that the 8 for rising rates of mortality, mental-health problems, and addicting 9 poorly-educated middle-aged people is shortage of well-paid jobs. Perhaps this is why many 10 the agonizing dullness of a jobless future.

But it doesn't 11 follow from findings like these that a world without work would be filled with unease. Such visions are based on the 12 of being unemployed in a society built on the concept of employment. In the 13 of work, a society designed with other ends in mind could 14 strikingly different circumstances for the future of labor and leisure. Today, the 15 of work may be a bit overblown. "Many jobs are boring, degrading, unhealthy, and a waste of human potential," says John Danaher, a lecturer at the National University of Ireland in Galway.

These days, because leisure time is relatively 16 for most workers, people use their free time to counterbalance the intellectual and emotional 17 of their jobs. "When I come home from a hard day's work, I often feel 18," Danaher says, adding, "In a world in which I don't have to work, I

might feel rather different” – perhaps different enough to throw himself 19 a hobby or a passion project with the intensity usually reserved for 20 matters.

Read the following four texts. Answer the questions below each text by choosing A, B, C or D. Mark your answers on the ANSWER SHEET. (40 points)

### Text 1

Every Saturday morning, at 9 am, more than 50,000 runners set off to run 5km around their local park. The Parkrun phenomenon began with a dozen friends and has inspired 400 events in the UK and more abroad. Events are free, staffed by thousands of volunteers. Runners range from four years old to grandparents; their times range from Andrew Baddeley's world record 13 minutes 48 seconds up to an hour.

Parkrun is succeeding where London's Olympic "legacy" is failing. Ten years ago on Monday, it was announced that the Games of the 30th Olympiad would be in London. Planning documents pledged that the great legacy of the Games would be to level a nation of sport lovers away from their couches. The population would be fitter, healthier and produce more winners. It has not happened. The number of adults doing weekly sport did rise, by nearly 2 million in the run-up to 2012—but the general population was growing faster. Worse, the numbers are now falling at an accelerating rate. The opposition claims primary school pupils doing at least two hours of sport a week have nearly halved. Obesity has risen among adults and children. Official retrospections continue as to why London 2012 failed to "inspire a generation." The success of Parkrun offers answers.

Parkrun is not a race but a time trial: Your only competitor is the clock. The ethos welcomes anybody. There is as much joy over a puffed-out first-timer being clapped over the line as there is about top talent shining. The Olympic bidders, by contrast, wanted to get more people doing sports and to produce more elite athletes. The dual aim was mixed up: The stress on success over taking part was intimidating for newcomers.

Indeed, there is something a little absurd in the state getting involved in the planning of such a fundamentally "grassroots", concept as community sports associations. If there is a role for government, it should really be getting involved in providing common goods—making sure there is space for playing fields and the money to pave tennis and netball courts, and encouraging the provision of all these activities in schools. But successive governments have presided over selling green spaces, squeezing money from local authorities and declining attention on sport in education. Instead of wordy, worthy strategies, future governments need to do more to provide the conditions for sport to thrive. Or at least not make them worse.

21. According to Paragraph1, Parkrun has \_\_\_\_\_.

- |                                |                                |
|--------------------------------|--------------------------------|
| A. gained great popularity     | B. created many jobs           |
| C. strengthened community ties | D. become an official festival |

be exquisitely parents at all times, but there needs to be a balance and parents need to be responsive and sensitive to a child's verbal or nonverbal expressions of an emotional need," says Radesky.

On the other hand, Tronick himself is concerned that the worries about kids' use of screens are born out of an "oppressive ideology that demands that parents should always be interacting" with their children: "It's based on a somewhat fantasized, very white, very upper-middle-class ideology that says if you're failing to expose your child to 30,000 words you are neglecting them." Tronick believes that just because a child isn't learning from the screen doesn't mean there's no value to it—particularly if it gives parents time to have a shower, do housework or simply have a break from their child. Parents, he says, can get a lot out of using their devices to speak to a friend or get some work out of the way. This can make them feel happier, which lets them be more available to their child the rest of the time.

26. According to Jenny Radesky, digital products are designed to \_\_\_\_\_.  
A. simplify routine matters  
B. absorb user attention  
C. better interpersonal relations  
D. increase work efficiency
27. Radesky's food-testing exercise shows that mothers' use of devices \_\_\_\_\_.  
A. takes away babies' appetite  
B. distracts children's attention  
C. slows down babies' verbal development  
D. reduces mother-child communication
28. Radesky's cites the "still face experiment" to show that \_\_\_\_\_.  
A. it is easy for children to get used to blank expressions  
B. verbal expressions are unnecessary for emotional exchange  
C. children are insensitive to changes in their parents' mood  
D. parents need to respond to children's emotional needs
29. The oppressive ideology mentioned by Tronick requires parents to \_\_\_\_\_.  
A. protect kids from exposure to wild fantasies  
B. teach their kids at least 30,000 words a year  
C. ensure constant interaction with their children  
D. remain concerned about kid's use of screens
30. According to Tronick, kid's use of screens may \_\_\_\_\_.  
A. give their parents some free time  
B. make their parents more creative  
C. help them with their homework  
D. help them become more attentive

### Text 3

Today, widespread social pressure to immediately go to college in conjunction with increasingly high expectations in a fast-moving world often causes students to completely overlook the possibility of taking a gap year. After all, if everyone you know is going to college in the fall, it seems silly to stay back a year, doesn't it? And after going to school for 12 years, it doesn't feel natural to spend a year doing something that isn't academic.

But while this may be true, it's not a good enough reason to condemn gap years. There's always a constant fear of falling behind everyone else on the socially perpetuated "race to the finish line," whether that be toward graduate school, medical school or lucrative career. But despite common misconceptions, a gap year does not hinder the success of academic pursuits—in fact, it probably enhances it.

Studies from the United States and Australia show that students who take a gap year are generally better prepared for and perform better in college than those who do not. Rather than pulling students back, a gap year pushes them ahead by preparing them for independence, new responsibilities and environmental changes—all things that first-year students often struggle with the most. Gap year experiences can lessen the blow when it comes to adjusting to college and being thrown into a brand new environment, making it easier to focus on academics and activities rather than acclimation blunders.

If you're not convinced of the inherent value in taking a year off to explore interests, then consider its financial impact on future academic choices. According to the National Center for Education Statistics, nearly 80 percent of college students end up changing their majors at least once. This isn't surprising, considering the basic mandatory high school curriculum leaves students with a poor understanding of themselves listing one major on their college applications, but switching to another after taking college classes. It's not necessarily a bad thing, but depending on the school, it can be costly to make up credits after switching too late in the game. At Boston College, for example, you would have to complete an extra year were you to switch to the nursing school from another department. Taking a gap year to figure things out initially can help prevent stress and save money later on.

31. One of the reasons for high-school graduates not taking a gap year is that \_\_\_\_\_.

- A. they think it academically misleading
- B. they have a lot of fun to expect in college

- C. it feels strange to do differently from others  
D. it seems worthless to take off-campus courses
32. **Studies from the US and Australia imply that taking a gap year helps \_\_\_\_\_.**  
A. keep students from being unrealistic  
B. lower risks in choosing careers  
C. ease freshmen's financial burdens  
D. relieve freshmen of pressures
33. **The word "acclimation" (Line 8, Para. 3) is closest in meaning to \_\_\_\_\_.**  
A. adaptation                      B. application                      C. motivation                      D. competition
34. **A gap year may save money for students by helping them \_\_\_\_\_.**  
A. avoid academic failures  
B. establish long-term goals  
C. switch to another college  
D. decide on the right major
35. **The most suitable title for this text would be \_\_\_\_\_.**  
A. In Favor of the Gap Year  
B. The ABCs of the Gap Year  
C. The Gap Year Comes Back  
D. The Gap Year: A Dilemma

#### Text 4

Though often viewed as a problem for western states, the growing frequency of wildfires is a national concern because of its impact on federal tax dollars, says Professor Max Moritz, a specialist in fire ecology and management.

In 2015, the US Forest Service for the first time spent more than half of its \$ 5.5 billion annual budget fighting fires—nearly double the percentage it spent on such efforts 20 years ago. In effect, fewer federal funds today are going towards the agency's other work—such as forest conservation, watershed and cultural resources management, and infrastructure upkeep—that affect the lives of all Americans.

Another nationwide concern is whether public funds from other agencies are going into construction in fire-prone districts. As Moritz puts it, how often are federal dollars building homes that are likely to be lost to a wildfire?

“It’s already a huge problem from a public expenditure perspective for the whole country,” he says. We need to take a magnifying glass to that. Like, “Wait a minute, is this OK?” “Do we want instead to redirect those funds to concentrate on lower-hazard parts of the landscape?”

Such a view would require a corresponding shift in the way US society today views fire, researchers say.

For one thing, conversations about wildfires need to be more inclusive. Over the past decade, the focus has been on climate change—how the warming of the Earth from greenhouse gases is leading to conditions that worsen fires.

While climate is a key element, Moritz says, it shouldn’t come at the expense of the rest of the equation.

“The human systems and the landscapes we live on are linked, and the interactions go both ways,” he says. Failing to recognize that, he notes, leads to “an overly simplified view of what the solutions might be. Our perception of the problem and of what the solution is becomes very limited.”

At the same time, people continue to treat fire as an event that needs to be wholly controlled and unleashed only out of necessity, says Professor Balch at the University of Colorado. But acknowledging fire’s inevitable presence in human life is an attitude crucial to developing the laws, policies, and practices that make it as safe as possible, she says.

“We’ve disconnected ourselves from living with fire,” Balch says. “It is really important to understand and try and tease out what is the human connection with fire today.”

**36. More frequent wildfires have become a national concern because in 2015 they \_\_\_\_\_.**

- A. exhausted unprecedented management efforts
- B. consumed a record-high percentage of budget
- C. severely damaged the ecology of western states
- D. caused a huge rise of infrastructure expenditure

**37. Moritz calls for the use of “a magnifying glass” to \_\_\_\_\_.**

- A. raise more funds for fire-prone areas
- B. avoid the redirection of federal money
- C. find wildfire-free parts of the landscape
- D. guarantee safer spending of public funds

**38. While admitting that climate is a key element, Moritz notes that \_\_\_\_\_.**

- A. public debates have not settled yet
- B. fire-fighting conditions are improving

- C. other factors should not be overlooked
- D. a shift in the view of fire has taken place
39. **The overly simplified view Moritz mentions is a result of failing to \_\_\_\_\_.**
- A. discover the fundamental makeup of nature
- B. explore the mechanism of the human systems
- C. maximize the role of landscape in human life
- D. understand the interrelations of man and nature
40. **Professor Balch points out that fire is something man should \_\_\_\_\_.**
- A. do away with
- B. come to terms with
- C. pay a price for
- D. keep away from

## Part B

**Directions:**

Read the following text and match each of the numbered items in the left column to its corresponding information in the right column. There are two extra choices in the right column. Mark your answers on the ANSWER SHEET. (10 points)

The decline in American manufacturing is a common refrain, particularly from Donald Trump. “We don’t make anything anymore,” he told Fox News, while defending his own made-in-Mexico clothing line.

Without question, manufacturing has taken a significant hit during recent decades, and further trade deals raise questions about whether new shocks could hit manufacturing.

But there is also a different way to look at the data.

Across the country, factory owners are now grappling with a new challenge: instead of having too many workers, they may end up with too few. Despite trade competition and outsourcing, American manufacturing still needs to replace tens of thousands of retiring boomers every years. Millennials may not be that interested in taking their place, other industries are recruiting them with similar or better pay.

For factory owners, it all adds up to stiff competition for workers—and upward pressure on wages. “They’re harder to find and they have job offers,” says Jay Dunwell, president of Wolverine Coil Spring, a family-owned firm, “They may be coming [into the workforce], but they’ve been plucked by other industries that are also doing an well as manufacturing,” Mr. Dunwell has begun bringing high school juniors to the factory so they can get exposed to its culture.

At RoMan Manufacturing, a maker of electrical transformers and welding equipment that his father cofounded in 1980, Robert Roth keep a close eye on the age of his nearly 200 workers, five are retiring this year. Mr. Roth has three community-college students enrolled in a work-placement program, with a starting wage of \$ 13 an hour that rises to \$ 17 after two years.

At a worktable inside the transformer plant, young Jason Stenquist looks flustered by the copper coils he's trying to assemble and the arrival of two visitors. It's his first week on the job. Asked about his choice of career, he says at high school he considered medical school before switching to electrical engineering. "I love working with tools. I love creating." he says.

But to win over these young workers, manufacturers have to clear another major hurdle: parents, who lived through the worst US economic downturn since the Great Depression, telling them to avoid the factory. Millennials "remember their father and mother both were laid off. They blame it on the manufacturing recession," says Birgit Klohs, chief executive of The Right Place, a business development agency for western Michigan.

These concerns aren't misplaced: Employment in manufacturing has fallen from 17 million in 1970 to 12 million in 2013. When the recovery began, worker shortages first appeared in the high-skilled trades. Now shortages are appearing at the mid-skill levels.

"The gap is between the jobs that take to skills and those that require a lot of skill," says Rob Spohr, a business professor at Montcalm Community College. "There're enough people to fill the jobs at McDonalds and other places where you don't need to have much skill. It's that gap in between, and that's where the problem is."

Julie Parks of Grand Rapids Community points to another key to luring Millennials into manufacturing: a work/life balance. While their parents were content to work long hours, young people value flexibility. "Overtime is not attractive to this generation. They really want to live their lives," she says.

41. Jay Deuwell

42. Jason Stenquist

43. Birgit Klohs

44. Rob Spohr

45. Julie Parks

[A] says that he switched to electrical engineering because he loves working with tools。

[B] points out that there are enough people to fill the jobs that don't need much skill。

[C] points out that the US doesn't manufacture anything anymore。

- [D] believes that it is important to keep a close eye on the age of his workers。
- [E] says that for factory owners, workers are harder to find because of stiff competition。
- [F] points out that a work/life balance can attract young people into manufacturing。
- [G] says that the manufacturing recession is to blame for the lay-off the young people's parents。

### Section III Translation

#### Directions:

Read the following text carefully and then translate the underlined segments into Chinese. Your translation should be written neatly on the ANSWER SHEET. (10 points)

#### 46. My Dream

My dream has always been to work somewhere in an area between fashion and publishing. Two years before graduating from secondary school, I took a sewing and design course thinking that I would move on to a fashion design course. However, during that course I realised that I was not good enough in this area to compete with other creative personalities in the future, so I decided that it was not the right path for me. Before applying for university I told everyone that I would study journalism, because writing was, and still is, one of my favourite activities. But, to be absolutely honest, I said it, because I thought that fashion and me together was just a dream - I knew that no one, apart from myself, could imagine me in the fashion industry at all!

### Section IV Writing

#### Part A

#### 47. Directions:

Suppose you are invited by Professor Williams to give a presentation about Chinese culture to a group of international students. Write a reply to

- 1) Accept the invitation, and
- 2) Introduce the key points of your presentation.

You should write neatly on the ANSWER SHEET.

**Do not** sign your own name at the end of the letter, use “Li Ming” instead.

**Do not** write the address. (10 points)

**48. Directions:**

Write your essay on ANSWER SHEET. (15 points)

You should

- 1) interpret the chart, and
- 2) give your comments.

You should write about 150 words on the ANSWER SHEET. (15points)

2013—2015 我国博物馆数量和参观人数

## 2016 年全国硕士研究生入学统一考试英语(二)试题

### Section I Use of English

#### Directions:

Read the following text. Choose the best word(s) for each numbered blank and mark A, B, C or D on the ANSWER SHEET. (10 points)

Happy people work differently. They're more productive, more creative, and willing to take greater risks. And new research suggests that happiness might influence 1 firms work, too.

Companies located in place with happier people invest more, according to a recent research paper. 2, firms in happy places spend more on R&D (research and development). That's because happiness is linked to the kind of longer-term thinking 3 for making investment for the future.

The researchers wanted to know if the 4 and inclination for risk-taking that come with happiness would 5 the way companies invested. So they compared U.S. cities' average happiness 6 by Gallup polling with the investment activity of publicly traded firms in those areas.

7 enough, firms' investment and R&D intensity were correlated with the happiness of the area in which they were 8. But it is really happiness that's linked to investment, or could something else about happier cities 9 why firms there spend more on R&D? To find out, the researchers controlled for various 10 that might make firms more likely to invest like size, industry, and sales-and for indicators that a place was 11 to live in, like growth in wages or population. They link between happiness and investment generally 12 even after accounting for these things.

The correlation between happiness and investment was particularly strong for younger firms, which the authors 13 to "less codified decision making process" and the possible presence of "younger and less 14 managers who are more likely to be influenced by sentiment." The relationship was 15 stronger in places where happiness was spread more 16. Firms seem to invest more in places where most people are relatively happy, rather than in places with happiness inequality.

17 this doesn't prove that happiness causes firms to invest more or to take a longer-term

view, the authors believe it at least 18 at that possibility. It's not hard to imagine that local culture and sentiment would help 19 how executives think about the future. "It surely seems plausible that happy people would be more forward - thinking and creative and 20 R&D more than the average," said one researcher.

- |                      |                   |                 |                   |

| 20. [A] pray for     | [B] lean towards  | [C] give away   | [D] send out      |

## Section II Reading Comprehension

### Part A

#### Directions:

Read the following four texts. Answer the questions below each text by choosing A, B, C or D. Mark your answers on the ANSWER SHEET. (40 points)

## Text 1

It's true that high-school coding classes aren't essential for learning computer science in college. Students without experience can catch up after a few introductory courses, said Tom Cortina, the assistant dean at Carnegie Mellon's School of Computer Science.

However, Cortina said, early exposure is beneficial. When younger kids learn computer science, they learn that it's not just a confusing, endless string of letters and numbers – but a tool to build apps, or create artwork, or test hypotheses. It's not as hard for them to transform their thought processes as it is for older students. Breaking down problems into bite-sized chunks and using code to solve them becomes normal. Giving more children this training could increase the number of people interested in the field and help fill the jobs gap, Cortina said.

Students also benefit from learning something about coding before they get to college, where introductory computer-science classes are packed to the brim, which can drive the less-experienced or determined students away.

The Flatiron School, where people pay to learn programming, started as one of the many coding bootcamps that's become popular for adults looking for a career change. The high-schoolers get the same curriculum, but “we try to gear lessons toward things they're interested in,” said Victoria Friedman, an instructor. For instance, one of the apps the students are developing suggests movies based on your mood.

The students in the Flatiron class probably won't drop out of high school and build the next Facebook. Programming languages have a quick turnover, so the “Ruby on Rails” language they learned may not even be relevant by the time they enter the job market. But the skills they learn – how to think logically through a problem and organize the results – apply to any coding language, said Deborah Seehorn, an education consultant for the state of North Carolina.

Indeed, the Flatiron students might not go into IT at all. But creating a future army of coders is not the sole purpose of the classes. These kids are going to be surrounded by computers-in their pockets, in their offices, in their homes – for the rest of their lives. The younger they learn how computers think, how to coax the machine into producing what they want – the earlier they learn that they have the power to do that – the better.

**21. Cortina holds that early exposure to computer science makes it easier to \_\_\_\_\_.**

- [A] complete future job training
- [B] remodel the way of thinking

- [ C ] formulate logical hypotheses
- [ D ] perfect artwork production
22. In delivering lessons for high - schoolers, Flatiron has considered their \_\_\_\_\_.  
[ A ] experience  
[ B ] interest  
[ C ] career prospects  
[ D ] academic backgrounds
23. Deborah Seehorn believes that the skills learned at Flatiron will \_\_\_\_\_.  
[ A ] help students learn other computer languages  
[ B ] have to be upgraded when new technologies come  
[ C ] need improving when students look for jobs  
[ D ] enable students to make big quick money
24. According to the last paragraph, Flatiron students are expected to \_\_\_\_\_.  
[ A ] bring forth innovative computer technologies  
[ B ] stay longer in the information technology industry  
[ C ] become better prepared for the digitalized world  
[ D ] compete with a future army of programmers
25. The word “coax” (Line4, Para.6) is closest in meaning to \_\_\_\_\_.  
[ A ] persuade                      [ B ] frighten                      [ C ] misguide                      [ D ] challenge

## Text 2

Biologists estimate that as many as 2 million lesser prairie chickens – a kind of bird living on stretching grasslands - once lent red to the often grey landscape of the midwestern and southwestern United States. But just some 22,000 birds remain today, occupying about 16% of the species' historic range.

The crash was a major reason the U.S. Fish and Wildlife Service (USFWS) decided to formally list the bird as threatened. “The lesser prairie chicken is in a desperate situation,” said USFWS Director Daniel Ashe. Some environmentalists, however, were disappointed. They had pushed the agency to designate the bird as “endangered,” a status that gives federal officials greater regulatory power to crack down on threats. But Ashe and others argued that the “threatened” tag gave the federal government flexibility to try out new, potentially less confrontational conservation approaches. In particular, they called for forging closer collaborations with western state

governments, which are often uneasy with federal action, and with the private landowners who control an estimated 95% of the prairie chicken's habitat.

Under the plan, for example, the agency said it would not prosecute landowners or businesses that unintentionally kill, harm, or disturb the bird, as long as they had signed a range-wide management plan to restore prairie chicken habitat. Negotiated by USFWS and the states, the plan requires individuals and businesses that damage habitat as part of their operations to pay into a fund to replace every acre destroyed with 2 new acres of suitable habitat. The fund will also be used to compensate landowners who set aside habitat. USFWS also set an interim goal of restoring prairie chicken populations to an annual average of 67,000 birds over the next 10 years. And it gives the Western Association of Fish and Wildlife Agencies (WAFWA), a coalition of state agencies, the job of monitoring progress. Overall, the idea is to let "states remain in the driver's seat for managing the species," Ashe said.

Not everyone buys the win-win rhetoric. Some Congress members are trying to block the plan, and at least a dozen industry groups, four states, and three environmental groups are challenging it in federal court. Not surprisingly, industry groups and states generally argue it goes too far, environmentalists say it doesn't go far enough. "The federal government is giving responsibility for managing the bird to the same industries that are pushing it to extinction," says biologist Jay Lininger.

**26. The major reason for listing the lesser prairie chicken as threatened is \_\_\_\_\_.**

- [ A ] its drastically decreased population
- [ B ] the underestimate of the grassland acreage
- [ C ] a desperate appeal from some biologists
- [ D ] the insistence of private landowners

**27. The "threatened" tag disappointed some environmentalists in that it \_\_\_\_\_.**

- [ A ] was a give-in to governmental pressure
- [ B ] would involve fewer agencies in action
- [ C ] granted less federal regulatory power
- [ D ] went against conservation policies

**28. It can be learned from Paragraph 3 that unintentional harm-doers will not be prosecuted if they \_\_\_\_\_.**

- [ A ] agree to pay a sum for compensation
- [ B ] volunteer to set up an equally big habitat
- [ C ] offer to support the WAFWA monitoring job

[ D ] promise to raise fundsfor USFWS operations

29. According to Ashe, the leading role in managing the species is \_\_\_\_\_.

[ A ] the federal government

[ B ] the wildlifeagencies

[ C ] thelandowners

[ D ] thestates

30. Jay Lininger would most likely support \_\_\_\_\_.

[ A ] industrygroups

[ B ] the win-winrhetic

[ C ] environmental groups

[ D ] the plan underchallenge

### Text 3

That everyone's too busy these days is a cliché. But one specific complaint is made especially mournfully: There's never any time to read.

What makes the problem thornier is that the usual time-management techniques don't seem sufficient. The web's full of articles offering tips on making time to read: "Give up TV" or "Carry a book with you at all times." But in my experience, using such methods to free up the odd 30 minutes doesn't work. Sit down to read and the flywheel of work-related thoughts keeps spinning - or else you're so exhausted that a challenging book's the last thing you need. The modern mind, Tim Parks, a novelist and critic, writes, "is overwhelmingly inclined toward communication... It is not simply that one is interrupted; it is that one is actually inclined to interruption." Deep reading requires not just time, but a special kind of time which can't be obtained merely by becoming more efficient.

In fact, "becoming more efficient" is part of the problem. Thinking of time as a resource to be maximised means you approach it instrumentally, judging any given moment as well spent only in so far as it advances progress toward some goal. Immersive reading, by contrast, depends on being willing to risk inefficiency, goallessness, even time-wasting. Try to slot it as a to-do list item and you'll manage only goal-focused reading - useful, sometimes, but not the most fulfilling kind. "The future comes at us like empty bottles along an unstoppable and nearly infinite conveyor belt," writes Gary Eberle in his book *Sacred Time*, and "we feel a pressure to fill these different-sized bottles (days, hours, minutes) as they pass, for if they get by without being filled, we will have wasted them." No mind-set could be worse for losing yourself in a book.

So what does work? Perhaps surprisingly, scheduling regular times for reading. You'd think this might fuel the efficiency mind-set, but in fact, Eberle notes, such ritualistic behaviour helps us "step outside time's flow" into "soul time." You could limit distractions by reading only physical

books, or on single-purpose e-readers. “Carry a book with you at all times” can actually work, too - providing you dip in often enough, so that reading becomes the default state from which you temporarily surface to take care of business, before dropping back down. On a really good day, it no longer feels as if you’re “making time to read,” but just reading, and making time for everything else.

**31. The usual time-management techniques don’t work because.**

- [ A ] what they can offer does not ease the modern mind
- [ B ] what challenging books demand is repetitive reading
- [ C ] what people often forget is carrying a book with them
- [ D ] what deep reading requires cannot be guaranteed

**32. The “empty bottles” metaphor illustrates that people feel a pressure to.**

- [ A ] update their to-do lists
- [ B ] make passing time fulfilling
- [ C ] carry their plans through
- [ D ] pursue carefree reading

**33. Eberle would agree that scheduling regular times for reading helps.**

- [ A ] encourage the efficiency mind-set
- [ B ] develop online reading habits
- [ C ] promote ritualistic reading
- [ D ] achieve immersive reading

**34. “Carry a book with you at all times” can work if.**

- [ A ] reading becomes your primary business of the day
- [ B ] all the daily business has been promptly dealt with
- [ C ] you are able to drop back to business after reading
- [ D ] time can be evenly split for reading and business

**35. The best title for this text could be.**

- [ A ] How to Enjoy Easy Reading
- [ B ] How to Find Time to Read
- [ C ] How to Set Reading Goals
- [ D ] How to Read Extensively

**Text 4**

Against a backdrop of drastic changes in economy and population structure, younger Americans

are drawing a new 21st-century road map to success, a latest poll has found.

Across generationallines, Americans continue to prize many of the same traditional milestones of a successful life, including getting married, having children, owning a home, and retiring in their sixties. But while young and old mostly agree on what constitutes the finish line of a fulfilling life, they offer strikingly different paths for reaching it.

Young people who are still getting started in life were more likely than older adults to prioritize personal fulfillment in their work, to believe they will advance their careers most by regularly changing jobs, to favor communities with more public services and a faster pace of life, to agree that couples should be financially secure before getting married or having children, and to maintain that children are best served by two parents working outside the home, the survey found.

From career to community and family, these contrasts suggest that in the aftermath of the searing Great Recession, those just starting out in life are defining priorities and expectations that will increasingly spread through virtually all aspects of American life, from consumer preferences to housing patterns to politics.

Young and old converge on one key point: Overwhelming majorities of both groups said they believe it is harder for young people today to get started in life than it was for earlier generations. While younger people are somewhat more optimistic than their elders about the prospects for those starting out today, big majorities in both groups believe those “just getting started in life” face a tougher a good-paying job, starting a family, managing debt, and finding affordable housing.

Pete Schneider considers the climb tougher today. Schneider, a 27-year-old auto technician from the Chicago suburbs says he struggled to find a job after graduating from college. Even now that he is working steadily, he said. “I can’t afford to pay my monthly mortgage payments on my own, so I have to rent rooms out to people to make that happen.” Looking back, he is struck that his parents could provide a comfortable life for their children even though neither had completed college when he was young. “I still grew up in an upper middle-class home with parents who didn’t have college degrees,” Schneider said. “I don’t think people are capable of that anymore.”

**36. One cross-generation mark of a successful life is.**

- [ A ] trying out different lifestyles
- [ B ] having a family with children
- [ C ] working beyond retirement age
- [ D ] setting up a profitable business

37. It can be learned from Paragraph 3 that young people tend to.

- [ A ] favor a slower life pace
- [ B ] hold an occupation longer
- [ C ] attach importance to pre-marital finance
- [ D ] give priority to childcare outside the home

38. The priorities and expectations defined by the young will.

- [ A ] become increasingly clear
- [ B ] focus on materialistic issues
- [ C ] depend largely on political preferences
- [ D ] reach almost all aspects of American life

39. Both young and old agree that.

- [ A ] good-paying jobs are less available
- [ B ] the old made more life achievements
- [ C ] housing loans today are easy to obtain
- [ D ] getting established is harder for the young

40. Which of the following is true about Schneider?

- [ A ] He found a dream job after graduating from college.
- [ B ] His parents believe working steadily is a must for success.
- [ C ] His parents' good life has little to do with a college degree.
- [ D ] He thinks his job as a technician quite challenging

## Part B

### Directions:

Read the following text and answer the questions by choosing the most suitable subheading from the list A-G for each numbered paragraphs (41-45). There are two extra subheadings which you do not need to use. Mark your answers on the ANSWER SHEET. (10 points)

- [ A ] Be silly
- [ B ] Have fun
- [ C ] Ask for help
- [ D ] Express your emotions

[E] Don't overthink it

[F] Be easily pleased

[G] Notice things

Act Your Shoe Size, Not Your Age.

(1) As adults, it seems that we're constantly pursuing happiness, often with mixed results. Yet children appear to have it down to an art-and for the most part they don't need self-help books or therapy. Instead, they look after their wellbeing instinctively and usually more effectively than we do as grownups. Perhaps it's time to learn a few lessons from them.

41 \_\_\_\_\_

(2) What does a child do when he's sad? He cries. When he's angry? He shouts. Scared? Probably a bit of both. As we grow up, we learn to control our emotions so they are manageable and don't dictate our behaviours, which is in many ways a good thing. But too often we take this process too far and end up suppressing emotions, especially negative ones. That's about as effective as brushing dirt under a carpet and can even make us ill. What we need to do is find a way to acknowledge and express what we feel appropriately, and then-again, like children-move on.

42 \_\_\_\_\_

A couple of Christmases ago, my youngest stepdaughter, who was nine years old at the time, got a Superman T-shirt for Christmas. It cost less than a fiver but she was overjoyed, and couldn't stop talking about it. Too often we believe that a new job, bigger house or better car will be the magic silver bullet that will allow us to finally be content, but the reality is these things have little lasting impact on our happiness levels. Instead, being grateful for small things every day is a much better way to improve wellbeing.

43 \_\_\_\_\_

Have you ever noticed how much children laugh? If we adults could indulge in a bit of silliness and giggling, we would reduce the stress hormones in our bodies, increase good hormones like endorphins, improve blood flow to our hearts and even have a greater chance of fighting off infection. All of which would, of course, have a positive effect on our happiness levels.

44 \_\_\_\_\_

The problem with being a grownup is that there's an awful lot of serious stuff to deal with-work, mortgage payments, figuring out what to cook for dinner. But as adults we also have the luxury of being able to control our own diaries and it's important that we schedule in time to enjoy the thing we love. Those things might be social, sporting, creative or completely random (dancing around the

living room, anyone?) - it doesn't matter, so long as they're enjoyable, and not likely to have negative side effects, such as drinking too much alcohol or going on a wild spending spree if you're on a tight budget.

45 \_\_\_\_\_

Having said all of the above, it's important to add that we shouldn't try too hard to be happy. Scientists tell us this can backfire and actually have a negative impact on our wellbeing. As the Chinese philosopher Chuang Tzu is reported to have said: "Happiness is the absence of striving for happiness." And in that, once more, we need to look to the example of our children, to whom happiness is not a goal but a natural byproduct of the way they live.

### Section III Translation

#### Directions:

Translate the following text into Chinese. Write your translation on the ANSWER SHEET. (15 points)

The supermarket is designed to lure customers into spending as much time as possible within its doors. The reason for this is simple: The longer you stay in the store, the more stuff you'll see, and the more stuff you see, the more you'll buy. And supermarkets contain a lot of stuff. The average supermarket, according to the Food Marketing Institute, carries some 44,000 different items, and many carry tens of thousands more. The sheer volume of available choice is enough to send shoppers into a state of information overload. According to brain-scan experiments, the demands of so much decision-making quickly become too much for us. After about 40 minutes of shopping, most people stop struggling to be rationally selective, and instead began shopping emotionally - which is the point at which we accumulate the 50 percent of stuff in our cart that we never intended buying.

## Section IV Writing

### Part A

#### 47. Directions:

Suppose you won a translation contest and your friend, Jack, wrote an email to congratulate you and ask for advice on translation. Write him a reply to

- 1) thank him, and
- 2) give you advice

You should write about 100 on the ANSWER SHEET.

**Do not** sign your own name at the end of the letter. Use Li Ming instead.

**Do not** write the address. (10 points)

### Part B

#### 48. Directions:

Write an essay based on the chart below. In your writing, you should

- 1) interpret the chart, and
- 2) give your comments.

You should write about 150 words on the ANSWER SHEET. (15 points)

## 2015 年全国硕士研究生入学统一考试英语(二)试题

### Section I Use of English

#### Directions:

Read the following text. Choose the best word(s) for each numbered blank and mark A, B, C or D on the ANSWER SHEET. (10 points)

In our contemporary culture, the prospect of communicating with – or even looking at – a stranger is virtually unbearable. Everyone around us seems to agree by the way they fiddle with their phones, even without a 1 on a subway.

It's a sad reality – our desire to avoid interacting with other human beings – because there's 2 to be gained from talking to the stranger standing by you. But you wouldn't know it, 3 into your phone. This universal protection sends the 4: "Please don't approach me."

What is it that makes us feel we need to hide 5 our screens?

One answer is fear, according to Jon Wortmann, executive mental coach. We fear rejection, or that our innocent social advances will be 6 as "weird." We fear we'll be 7. We fear we'll be disruptive.

Strangers are inherently 8 to us, so we are more likely to feel 9 when communicating with them compared with our friends and acquaintances. To avoid this uneasiness, we 10 to our phones. "Phones become our security blanket," Wortmann says. "They are our happy glasses that protect us from what we perceive is going to be more 11."

But once we rip off the band-aid, tuck our smartphones in our pockets and look up, it doesn't 12 so bad. In one 2011 experiment, behavioral scientists Nicholas Epley and Juliana Schroeder asked commuters to do the unthinkable: Start a 13. They had Chicago train commuters talk to their fellow 14. "When Dr. Epley and Ms. Schroeder asked other people in the same train station to 15 how they would feel after talking to a stranger, the commuters thought their 16 would be more pleasant if they sat on their own," the New York Times summarizes. Though the participants didn't expect a positive experience, after they 17 with the experiment, "not a single person repor-

ted having been embarrassed."

18 , these commutes were reportedly more enjoyable compared with those without communication, which makes absolute sense, 19 human beings thrive off of social connections. It's that 20 : Talking to strangers can make you feel connected.

## Section II Reading Comprehension

### Part A

#### Directions:

Read the following four texts. Answer the questions below each text by choosing A, B, C or D. Mark your answers on the ANSWER SHEET. (40 points)

### Text 1

A new study suggests that contrary to most surveys, people are actually more stressed at home than at work. Researchers measured people's cortisol, which is a stress marker, while they were at work and while they were at home and found it higher at what is supposed to be a place of refuge.

“Further contradicting conventional wisdom, we found that women as well as men have lower levels of stress at work than at home”, writes one of the researchers, Sarah Damske. In fact women even say they feel better at work, she notes. “It is men, not women, who report being happier at home than at work.” Another surprise is that findings hold true for both those with children and without, but more so for nonparents. This is why people who work outside the home have better health.

What the study doesn't measure is whether people are still doing work when they're at home, whether it is household work or work brought home from the office. For many men, the end of the workday is a time to kick back. For women who stay home, they never get to leave the office. And for women who work outside the home, they often are playing catch-up-with-household tasks. With the blurring of roles, and the fact that the home front lags well behind the workplace in making adjustments for working women, it's not surprising that women are more stressed at home.

But it's not just a gender thing. At work, people pretty much know what they're supposed to be doing: working, making money, doing the tasks they have to do in order to draw an income. The bargain is very pure: Employee puts in hours of physical or mental labor and employee draws out life-sustaining moola.

On the home front, however, people have no such clarity. Rare is the household in which the division of labor is so clinically and methodically laid out. There are a lot of tasks to be done, there are inadequate rewards for most of them. Your home colleagues – your family – have no clear rewards for their labor; they need to be talked into it, or if they're teenagers, threatened with complete removal of all electronic devices. Plus, they're your family. You cannot fire your family. You never really get to go home from home.

So it's not surprising that people are more stressed at home. Not only are the tasks apparently infinite, the co-workers are much harder to motivate.

**21. According to Paragraph 1, most previous surveys found that home \_\_\_\_\_.**

- [ A ] offered greater relaxation than the workplace
- [ B ] was an ideal place for stress measurement
- [ C ] generated more stress than the workplace

- [ D ] was an unrealistic place for relaxation
22. **According to Damaske, who are likely to be the happiest at home?**
- [ A ] Childless wives [ B ] Working mothers  
[ C ] Childless husbands [ D ] Working fathers
23. **The blurring of working women's roles refers to the fact that \_\_\_\_\_.**
- [ A ] it is difficult for them to leave their office  
[ B ] their home is also a place for kicking back  
[ C ] there is often much housework left behind  
[ D ] they are both bread winners and housewives
24. **The word "moola" ( Line4 , Para4 ) most probably means \_\_\_\_\_.**
- [ A ] skills [ B ] energy [ C ] earnings [ D ] nutrition
25. **The home front differs from the workplace in that \_\_\_\_\_.**
- [ A ] division of labor at home is seldom clear-cut  
[ B ] home is hardly a cozier working environment  
[ C ] household tasks are generally more motivating  
[ D ] family labor is often adequately rewarded

## Text 2

For years, studies have found that first-generation college students – those who do not have a parent with a college degree – lag other students on a range of education achievement factors. Their grades are lower and their dropout rates are higher. But since such students are most likely to advance economically if they succeed in higher education, colleges and universities have pushed for decades to recruit more of them. This has created “a paradox” in that recruiting first-generation students, but then watching many of them fail, means that higher education has “continued to reproduce and widen, rather than close” an achievement gap based on social class, according to the depressing beginning of a paper forthcoming in the journal *Psychological Science*.

But the article is actually quite optimistic, as it outlines a potential solution to this problem, suggesting that an approach ( which involves a one-hour, next-to-no-cost program ) can close 63 percent of the achievement gap ( measured by such factors as grades ) between first-generation and other students.

The authors of the paper are from different universities, and their findings are based on a study involving 147 students ( who completed the project ) at an unnamed private university. First genera-

tion was defined as not having a parent with a four-year college degree. Most of the first-generation students (59.1 percent) were recipients of Pell Grants, a federal grant for undergraduates with financial need, while this was true only for 8.6 percent of the students with at least one parent with a four-year degree.

Their thesis – that a relatively modest intervention could have a big impact – was based on the view that first-generation students may be most lacking not in potential but in practical knowledge about how to deal with the issues that face most college students. They cite past research by several authors to show that this is the gap that must be narrowed to close the achievement gap.

Many first-generation students “struggle to navigate the middle-class culture of higher education, learn the ‘rules of the game,’ and take advantage of college resources,” they write. And this becomes more of a problem when colleges don’t talk about the class advantages and disadvantages of different groups of students. “Because US colleges and universities seldom acknowledge how social class can affect students’ educational experiences, many first-generation students lack sight about why they are struggling and do not understand how students ‘like them’ can improve.”

26. **Recruiting more first-generation students has \_\_\_\_\_.**

- [ A ] reduced their dropout rates
- [ B ] narrowed the achievement gap
- [ C ] missed its original purpose
- [ D ] depressed college students

27. **The authors of the research article are optimistic because \_\_\_\_\_.**

- [ A ] the problem is solvable
- [ B ] their approach is costless
- [ C ] the recruiting rate has increased
- [ D ] their findings appeal to students

28. **The study suggests that most first- generation students \_\_\_\_\_.**

- [ A ] study at private universities
- [ B ] are from single-parent families
- [ C ] are in need of financial support
- [ D ] have failed their college

29. **The authors of the paper believe that first-generation students \_\_\_\_\_.**

- [ A ] are actually indifferent to the achievement gap

- [ B ] can have a potential influence on other students
- [ C ] may lack opportunities to apply for research projects
- [ D ] are inexperienced in handling their issues at college

30. We may infer from the last paragraph that \_\_\_\_\_.

- [ A ] universities often reject the culture of the middle-class
- [ B ] students are usually to blame for their lack of resources
- [ C ] social class greatly helps enrich educational experiences
- [ D ] colleges are partly responsible for the problem in question

### Text 3

Even in traditional offices, “the lingua franca of corporate America has gotten much more emotional and much more right-brained than it was 20 years ago,” said Harvard Business School professor Nancy Koehn. She started spinning off examples. “If you and I parachuted back to Fortune 500 companies in 1990, we would see much less frequent use of terms like journey, mission, passion. There were goals, there were strategies, there were objectives, but we didn’t talk about energy; we didn’t talk about passion.”

Koehn pointed out that this new era of corporate vocabulary is very “team”-oriented – and not by coincidence. “Let’s not forget sports – in male-dominated corporate America, it’s still a big deal. It’s not explicitly conscious; it’s the idea that I’m a coach, and you’re my team, and we’re in this together. There are lots and lots of CEOs in very different companies, but most think of themselves as coaches and this is their team and they want to win.”

These terms are also intended to infuse work with meaning – and, as Khurana, another professor, points out, increase allegiance to the firm. “You have the importation of terminology that historically used to be associated with non-profit organizations and religious organizations; terms like vision, values, passion, and purpose,” said Khurana.

This new focus on personal fulfillment can help keep employees motivated amid increasingly loud debates over work-life balance. The “mommy wars” of the 1990s are still going on today, prompting arguments about why women still can’t have it all and books like Sheryl Sandberg’s *Lean In*, whose title has become a buzzword in its own right. Terms like unplug, offline, life-hack, bandwidth, and capacity are all about setting boundaries between the office and the home. But if your work is your “passion,” you’ll be more likely to devote yourself to it, even if that means going home for dinner and then working long after the kids are in bed.

But this seems to be the irony of office speak: Everyone makes fun of it, but managers love it, companies depend on it, and regular people willingly absorb it. As linguist once said, “You can get people to think it’s nonsense at the same time that you buy into it.” In a workplace that’s fundamentally indifferent to your life and its meaning, office speak can help you figure out how you relate to your work – and how your work defines who you are.

31. According to Nancy Koehn, office language has become \_\_\_\_\_.

- |                      |                      |
|----------------------|----------------------|
| [ A ] more emotional | [ B ] more objective |
| [ C ] less energetic | [ D ] less strategic |

32. “Team”-oriented corporate vocabulary is closely related to \_\_\_\_\_.

- |                            |                           |
|----------------------------|---------------------------|
| [ A ] historical incidents | [ B ] gender difference   |
| [ C ] sports culture       | [ D ] athletic executives |

33. Khurana believes that the importation of terminology aims to \_\_\_\_\_.

- |                                    |                                   |
|------------------------------------|-----------------------------------|
| [ A ] revive historical terms      | [ B ] promote company image       |
| [ C ] foster corporate cooperation | [ D ] strengthen employee loyalty |

34. It can be inferred that Lean In \_\_\_\_\_.

- [ A ] voices for working women
- [ B ] appeals to passionate workaholics
- [ C ] triggers debates among mommies
- [ D ] praises motivated employees

35. Which of the following statements is true about office speak?

- [ A ] Managers admire it but avoid it.
- [ B ] Linguists believe it to be nonsense.
- [ C ] Companies find it to be fundamental.
- [ D ] Regular people mock it but accept it.

#### Text 4

Many people talked of the 288,000 new jobs the Labor Department reported for June, along with the drop in the unemployment rate to 6.1 percent, as good news. And they were right. For now it appears the economy is creating jobs at a decent pace. We still have a long way to go to get back to full employment, but at least we are now finally moving forward at a faster pace.

However, there is another important part of the jobs picture that was largely overlooked. There was a big jump in the number of people who report voluntarily working part-time. This figure is now

830,000(4.4 percent) above its year ago level.

Before explaining the connection to the Obamacare, it is worth making an important distinction. Many people who work part-time jobs actually want full-time jobs. They take part-time work because this is all they can get. An increase in involuntary part-time work is evidence of weakness in the labor market and it means that many people will be having a very hard time making ends meet.

There was an increase in involuntary part-time in June, but the general direction has been down. Involuntary part-time employment is still far higher than before the recession, but it is down by 640,000(7.9percent) from its year ago level.

We know the difference between voluntary and involuntary part-time employment because people tell us. The survey used by the Labor Department asks people if they worked less than 35 hours in the reference week. If the answer is “yes”, they are classified as working part-time. The survey then asks whether they worked less than 35 hours in that week because they wanted to work less than full time or because they had no choice. They are only classified as voluntary part-time workers if they tell the survey taker they chose to work less than 35 hours a week.

The issue of voluntary part-time relates to Obamacare because one of the main purposes was to allow people to get insurance outside of employment. For many people, especially those with serious health conditions or family members with serious health conditions, before Obamacare the only way to get insurance was through a job that provided health insurance.

However, Obamacare has allowed more than 12 million people to either get insurance through Medicaid or the exchanges. These are people who may previously have felt the need to get a full-time job that provided insurance in order to cover themselves and their families. With Obamacare there is no longer a link between employment and insurance.

**36. Which part of the jobs picture was neglected?**

- [ A ] The prospect of a thriving job market.
- [ B ] The increase of voluntary part-time jobs.
- [ C ] The possibility of full employment.
- [ D ] The acceleration of job creation.

**37. Many people work part-time because they \_\_\_\_\_.**

- [ A ] prefer part-time jobs to full-time jobs.
- [ B ] feel that is enough to make ends meet.
- [ C ] cannot get their hands on full-time jobs.

[ D ] haven't seen the weakness of the market.

### 38. Involuntary part-time employment in the US

[A] is harder to acquire than one year ago.

[ B ] shows a general tendency of decline.

[ C ] satisfies the real need of the jobless.

$[D]$  is lower than before the recession.

39. It can be learned that with Obamacare, \_\_\_\_\_.

[A] it is no longer easy for part-timers to get insurance

[ B ] employment is no longer a precondition to get insurance

[ C ] it is still challenging to get insurance for family members

[ D ] full-time employment is still essential for insurance

40. The text mainly discusses \_\_\_\_\_.

[A] employment in the US

[B] part-timer classification

[C] insurance through Medicaid

[D] Obamacare's trouble

## Part B

**Directions :**

Read the following text and answer the questions by choosing the most suitable subheading from the list A-G for each numbered paragraphs (41-45). There are two extra subheadings which you do not need to use. Mark your answers on the ANSWER SHEET. (10 points)

[A] You are not alone

[ B ] Don't fear responsibility for your life

[ C ] Pave your own unique path

[ D ] Most of your fears are unreal

[E] Think about the present moment

[ F ] Experience helps you grow

[ G ] There are many things to be grateful for

## Some Old Truths to Help You Overcome Tough Times

Unfortunately, life is not a bed of roses. We are going through life facing sad experiences. Moreover, we are grieving various kinds of loss: a friendship, a romantic relationship or a house. Hard

times may hold you down at what usually seems like the most inopportune time, but you should remember that they won't last forever.

When our time of mourning is over, we press forward, stronger with a greater understanding and respect for life. Furthermore, these losses make us mature and eventually move us toward future opportunities for growth and happiness. I want to share these old truths I've learned along the way.

41. \_\_\_\_\_

Fear is both useful and harmful. This normal human reaction is used to protect us by signaling danger and preparing us to deal with it. Unfortunately, people create inner barriers with a help of exaggerating fears. My favorite actor Will Smith once said, "Fear is not real. It is a product of thoughts you create. Do not misunderstand me. Danger is very real. But fear is a choice." I do completely agree that fears are just the product of our luxuriant imagination.

42. \_\_\_\_\_

If you are surrounded by problems and cannot stop thinking about the past, try to focus on the present moment. Many of us are weighed down by the past or anxious about the future. You may feel guilt over your past, but you are poisoning the present with the things and circumstances you cannot change. Value the present moment and remember how fortunate you are to be alive. Enjoy the beauty of the world around and keep the eyes open to see the possibilities before you. Happiness is not a point of future and not a moment from the past, but a mindset that can be designed into the present.

43. \_\_\_\_\_

Sometimes it is easy to feel bad because you are going through tough times. You can be easily caught up by life problems that you forget to pause and appreciate the things you have. Only strong people prefer to smile and value their life instead of crying and complaining about something.

44. \_\_\_\_\_

No matter how isolated you might feel and how serious the situation is, you should always remember that you are not alone. Try to keep in mind that almost everyone respects and wants to help you if you are trying to make a good change in your life, especially your dearest and nearest people. You may have a circle of friends who provide constant good humor, help and companionship. If you have no friends or relatives, try to participate in several online communities, full of people who are always willing to share advice and encouragement.

45. \_\_\_\_\_

Today many people find it difficult to trust their own opinion and seek balance by gaining objec-

tivity from external sources. This way you devalue your opinion and show that you are incapable of managing your own life. When you are struggling to achieve something important you should believe in yourself and be sure that your decision is the best. You live in your skin, think your own thoughts, have your own values and make your own choices.

### Section III Translation

#### Directions:

Translate the following text into Chinese. Write your translation on the ANSWER SHEET. (15 points)

Think about driving a route that's very familiar. It could be your commute to work, a trip into town or the way home. Whichever it is, you know every twist and turn like the back of your hand. On these sorts of trips it's easy to lose concentration on the driving and pay little attention to the passing scenery. The consequence is that you perceive that the trip has taken less time than it actually has.

This is the well-travelled road effect; People tend to underestimate the time it takes to travel a familiar route.

The effect is caused by the way we allocate our attention. When we travel down a well-known route, because we don't have to concentrate much, time seems to flow more quickly. And afterwards, when we come to think back on it, we can't remember the journey well because we didn't pay much attention to it. So we assume it was shorter.

### Section IV Writing

#### Part A

#### 47. Directions:

Suppose your university is going to host a summer camp for high school students. Write a notice to

- 1) briefly introduce the camp activities, and

2) call for volunteers.

You should write about 100 words on the ANSWER SHEET.

**Do not** use your name or the name of your university.

**Do not** write your address. (10 points)

## Part B

### 48. Directions:

Write an essay based on the following chart. In your writing, you should

1) interpret the chart, and

2) give your comments.

You should write about 150 words on the ANSWER SHEET. (15 points)

我国某市居民春节假期花销比例

Read the following text. Choose the best word(s) for each numbered blank and mark A, B, C or D on ANSWER SHEET. (10 points)

Thinner isn't always better. A number of studies have 1 that normal-weight people are in fact at higher risk of some diseases compared to those who are overweight. And there are health conditions for which being overweight is actually 2. For example, heavier women are less likely to develop calcium deficiency than thin women. 3, among the elderly, being somewhat overweight is often an 4 of good health.

Of even greater 5 is the fact that obesity turns out to be very difficult to define. It is often defined 6 body mass index, or BMI. BMI 7 body mass divided by the square of height. An adult with a BMI of 18 to 25 is often considered to be normal weight. Between 25 and 30 is overweight. And over 30 is considered obese. Obesity, 8, can be divided into moderately obese, severely obese, and very severely obese.

While such numerical standards seem 9, they are not. Obesity is probably less a matter of weight than body fat. Some people with a high BMI are in fact extremely fit, 10 others with a low BMI may be in poor 11. For example, many collegiate and professional football players 12 as obese, though their percentage body fat is low. Conversely, someone with a small frame may have high body fat but a 13 BMI.

Today we have a(an) 14 to label obesity as a disgrace. The overweight are sometimes 15 in the media with their faces covered. Stereotypes 16 with obesity include laziness, lack of will power, and lower prospects for success. Teachers, employers, and health professionals have been shown to harbor biases against the obese. 17 very young children tend to look down on the overweight, and teasing about body build has long been a problem in schools.

Negative attitudes toward obesity, 18 in health concerns, have stimulated a number of anti-

obesity 19. My own hospital system has banned sugary drinks from its facilities. Many employers have instituted weight loss and fitness initiatives. Michelle Obama has launched a high-visibility campaign 20 childhood obesity, even claiming that it represents our greatest national security threat.

## Section II Reading Comprehension

### Part A

#### Directions:

Read the following four texts. Answer the questions below each text by choosing A, B, C or D. Mark your answers on ANSWER SHEET. (40 points)

### Text 1

What would you do with \$ 590m? This is now a question for Gloria Mackenzie, an 84-year-old widow who recently emerged from her small, tin-roofed house in Florida to collect the biggest undivided lottery jackpot in history. If she hopes her new-found fortune will yield lasting feelings of fulfillment, she could do worse than read *Happy Money* by Elizabeth Dumn and Michael Norton.

These two academics use an array of behavioral research to show that the most rewarding ways to spend money can be counterintuitive. Fantasies of great wealth often involve visions of fancy cars and extravagant homes. Yet satisfaction with these material purchases wears off fairly quickly. What was once exciting and new becomes old-hat; regret creeps in. It is far better to spend money on experiences, say Ms. Dumn and Mr. Norton, like interesting trips, unique meals or even going to the cinema. These purchases often become more valuable with time-as stories or memories-particularly if they involve feeling more connected to others.

This slim volume is packed with tips to help wage slaves as well as lottery winners get the most “happiness bang for your buck.” It seems most people would be better off if they could shorten their commutes to work, spend more time with friends and family and less of it watching television (something the average American spends a whopping two months a year doing, and is hardly jollier for it). Buying gifts or giving to charity is often more pleasurable than purchasing things for oneself, and luxuries are most enjoyable when they are consumed sparingly. This is apparently the reason MacDonald’s restricts the availability of its popular McRib-a marketing trick that has turned the pork sandwich into an object of obsession.

Readers of *Happy Money* are clearly a privileged lot, anxious about fulfillment, not hunger. Money may not quite buy happiness, but people in wealthier countries are generally happier than those in poor ones. Yet the link between feeling good and spending money on others can be seen among rich and poor people around the world, and scarcity enhances the pleasure of most things for most people. Not everyone will agree with the authors’ policy ideas, which range from mandating more holiday time to reducing tax incentives for American homebuyers. But most people will come away from this book believing it was money well spent.

**21. According to Dumn and Norton, which of the following is the most rewarding purchase?**

[ A ] A big house

[ B ] A special tour

[ C ] A stylish car

[ D ] A rich meal

22. The author's attitude toward Americans' watching TV is \_\_\_\_\_.  
[A] critical [B] supportive [C] sympathetic [D] ambiguous
23. Macrib is mentioned in paragraph 3 to show that \_\_\_\_\_.  
[A] consumers are sometimes irrational  
[B] popularity usually comes after quality  
[C] marketing tricks are after effective  
[D] rarity generally increases pleasure
24. According to the last paragraph, Happy Money \_\_\_\_\_.  
[A] has left much room for readers' criticism  
[B] may prove to be a worthwhile purchase  
[C] has predicted a wider income gap in theUS.  
[D] may give its readers a sense of achievement
25. This text mainly discusses how to \_\_\_\_\_.  
[A] balance feeling good and spending money  
[B] spend large sums of money won in lotteries  
[C] obtain lasting satisfaction from money spent  
[D] become more reasonable in spending on luxuries

## Text 2

An article inScientific America has pointed out that empirical research says that, actually, you think you're more beautiful than you are. We have a deep-seated need to feel good about ourselves and we naturally employ a number of self-enhancing ( to use the psychological terminology ) strategies to achieve this. Social psychologists have amassed oceans of research into what they call the "above average effect", or "illusory superiority", and shown that, for example, 70% of us rate ourselves as above average in leadership, 93% in driving and 85% at getting on well with others – all obviously statistical impossibilities.

We rose-tint our memories and put ourselves into self-affirming situations. We become defensive when criticized, and apply negative stereotypes to others to boost our own esteem, we stalk around thinking we're hot stuff.

Psychologist and behavioral scientist Nicholas Epley oversaw a key studying into self-enhancement and attractiveness. Rather that have people simply rate their beauty compared with others, he asked them to identify an original photograph of themselves from a lineup including versions that had

been altered to appear more and less attractive. Visual recognition, reads the study, is “an automatic psychological process occurring rapidly and intuitively with little or no apparent conscious deliberation”. If the subjects quickly chose a falsely flattering image- which must did- they genuinely believed it was really how they looked.

Epley found no significant gender difference in responses. Nor was there any evidence that, those who self-enhance the most (that is, the participants who thought the most positively doctored picture were real) were doing so to make up for profound insecurities. In fact those who thought that the images higher up the attractiveness scale were real directly corresponded with those who showed other markers for having higher self-esteem. “I don’t think the findings that we have are any evidence of personal delusion”, says Epley. “It’s a reflection simply of people generally thinking well of themselves’. If you are depressed, you won’t be self-enhancing.

Knowing the results of Epley’s study, it makes sense that why people hate photographs of themselves so viscerally – on one level, they don’t even recognize the persons in the picture as themselves, Facebook therefore, is a self-enhancer’s paradise, where people can share only the most flattering photos, the cream of their wit ,style ,beauty, intellect and lifestyle. It’s not that people’s profiles are dishonest, says Catalina Toma of Wisconsin-Madison University, “but they portray an idealized version of themselves.” ( People are much more likely to out-and-out lie on dating websites, to an audience of strangers.)

**26. According to the first paragraph, social psychologists have found that \_\_\_\_\_.**

- [ A ] our self-ratings are unrealistically high
- [ B ] illusory superiority is baseless effect
- [ C ] our need for leadership is unnatural
- [ D ] self-enhancing strategies are ineffective

**27. Visual recognition is believed to be people’s \_\_\_\_\_.**

- [ A ] rapid watching
- [ B ] conscious choice
- [ C ] intuitive response
- [ D ] automatic self-defence

**28. Epley found that people with higher self-esteem tended to \_\_\_\_\_.**

- [ A ] underestimate their insecurities
- [ B ] believe in their attractiveness
- [ C ] cover up their depressions

- [ D ] oversimplify their illusions
29. The word “Viscerally” ( Line 2 ,para.5 ) is closest in meaning to \_\_\_\_\_.  
 [ A ] instinctively [ B ] occasionally  
 [ C ] particularly [ D ] aggressively
30. It can be inferred that Facebook is self-enhancer’s paradise because people can \_\_\_\_\_.  
 [ A ] present their dishonest profiles  
 [ B ] define their traditional life styles  
 [ C ] share their intellectual pursuits  
 [ D ] withhold their unflattering sides

### Text 3

The concept of man versus machine is at least as old as the industrial revolution, but this phenomenon tends to be most acutely felt during economic downturns and fragile recoveries. And yet, it would be a mistake to think we are right now simply experiencing the painful side of a boom and bust cycle. Certain Jobs have gone away for good, outmoded by machines. Since technology has such an insatiable appetite for eating up human jobs, this phenomenon will continue to restructure our economy in ways we can’t immediately foresee.

When there is rapid improvement in the price and performance of technology, jobs that were once thought to be immune from automation suddenly become threatened. This argument has attracted a lot of attention, via the success of the book *Against the Machine*, by Erik Brynjolfsson and Andrew McAfee, who both hail from MIT’s Center for Digital Business.

This is a powerful argument, and a scary one. And yet, John Hagel, author of *The Power of Pull* and other books, says Brynjolfsson and McAfee miss the reason why these jobs are so vulnerable to technology in the first place.

Hagel says we have designed jobs in the U.S. that tend to be “tightly scripted” and “highly standardized” ones that leave no room for “individual initiative or creativity.” In short, these are the types of jobs that machines can perform much better at than human beings. That is how we have put a giant target sign on the backs of American workers, Hagel says.

It’s time to reinvent the formula for how work is conducted, since we are still relying on a very 20th century notion of work, Hagel says. In our rapidly changing economy, we more than ever need people in the workplace who can take initiative and exercise their imagination “to respond to unex-

pected events.” That’s not something machines are good at. They are designed to perform very predictable activities.

As Hagel notes, Brynjolfsson and McAfee indeed touched on this point in their book. We need to reframe race against the machine as race with the machine. In our works, we need to look at the ways in which machines can augment human labor rather than replace it. So then the problem is not really about technology, but rather, “how do we innovate our institutions and our work practices?”

31. According to the first paragraph, economic downturns would \_\_\_\_\_.

- [ A ] ease the competition of man vs. machine
- [ B ] highlight machines’ threat to human jobs
- [ C ] provoke a painful technological revolution
- [ D ] outmode our current economic structure

32. The authors of *Race Against the Machine* argue that \_\_\_\_\_.

- [ A ] technology is diminishing man’s job opportunities
- [ B ] automation is accelerating technological development
- [ C ] certain jobs will remain intact after automation
- [ D ] man will finally win the race against machine

33. Hagel argues that jobs in the U.S. are often \_\_\_\_\_.

- [ A ] performer by innovative minds
- [ B ] scripted with an individual style
- [ C ] standardized without a clear target
- [ D ] designed against human creativity

34. According to the last paragraph, Brynjolfsson and McAfee discussed \_\_\_\_\_.

- [ A ] the predictability of machine behavior in practice
- [ B ] the formula for how work is conducted efficiently
- [ C ] the ways machines replace human labor in modern times
- [ D ] the necessity of human involvement in the workplace

35. Which of the following could be the most appropriate title for text?

- [ A ] How to Innovate Our Work Practices
- [ B ] Machines Will Replace Human Labor
- [ C ] Can We Win the Race Against Machines?
- [ D ] Economic Downturns Stimulate Innovations

**Text 4**

When the government talks about infrastructure contributing to the economy the focus is usually on roads, railways, broadband and energy. Housing is seldom mentioned.

Why is that? To some extent the housing sector must shoulder the blame. We have not been good at communicating the real value that housing can contribute to economic growth. Then there is the scale of the typical housing project. It is hard to shove for attention among multibillion-pound infrastructure project, so it is inevitable that the attention is focused elsewhere. But perhaps the most significant reason is that the issue has always been so politically charged. This government does not want to see a return to large-scale provision of council housing, so it is naturally wary of measures that will lead us down that route.

Nevertheless, the affordable housing situation is desperate. Waiting lists increase all the time and we are simply not building enough new homes.

The comprehensive spending review offers an opportunity for the government to help rectify this. It needs to put historical prejudices to one side and take some steps to address our urgent housing need.

There are some indications that it is preparing to do just that. The communities minister, Don Foster, has hinted that George Osborne, Chancellor of the Exchequer, may introduce more flexibility to the current cap on the amount that local authorities can borrow against their housing stock debt. Evidence shows that 60,000 extra new homes could be built over the next five years if the cap were lifted, increasing GDP by 0.6%.

Ministers should also look at creating greater certainty in the rental environment, which would have a significant impact on the ability of registered providers to fund new developments from revenues.

But it is not just down to the government. While these measures would be welcome in the short term, we must face up to the fact that the existing £ 4.5bn programme of grants to fund new affordable housing, set to expire in 2015, is unlikely to be extended beyond then. The Labour party has recently announced that it will retain a large part of the coalition's spending plans if returns to power. The housing sector needs to accept that we are very unlikely to ever return to era of large-scale public grants. We need to adjust to this changing climate.

**36. The author believes that the housing sector \_\_\_\_\_.**

[ A ] has attracted much attention

[ B ] involves certain political factors

- [ C ] shoulders too much responsibility  
[ D ] has lost its real value in economy
37. **It can be learned that affordable housing has \_\_\_\_\_.**  
[ A ] increased its home supply  
[ B ] offered spending opportunities  
[ C ] suffered government biases  
[ D ] disappointed the government
38. **According to Paragraph 5, George Osborne may \_\_\_\_\_.**  
[ A ] allow greater government debt for housing  
[ B ] stop local authorities from building homes  
[ C ] prepare to reduce housing stock debt  
[ D ] release a lifted GDP growth forecast
39. **It can be inferred that a stable rental environment would \_\_\_\_\_.**  
[ A ] lower the costs of registered providers  
[ B ] lessen the impact of government interference  
[ C ] contribute to funding new developments  
[ D ] relieve the ministers of responsibilities
40. **The author believes that after 2015, the government may \_\_\_\_\_.**  
[ A ] implement more policies to support housing  
[ B ] review the need for large-scale public grants  
[ C ] renew the affordable housing grants programme  
[ D ] stop generous funding to the housing sector

Emerging in the late Sixties and reaching a peak in the Seventies, Land Art was one of a range of new forms, including Body Art, Performance Art, Action Art and Installation Art, which pushed art beyond the traditional confines of the studio and gallery. Rather than portraying landscape, land

artists used the physical substance of the land itself as their medium.

The message of this survey of British land art – the most comprehensive to date – is that the British variant, typified by Richard Long's piece, was not only more domestically scaled, but a lot quirkier than its American counterpart. Indeed, while you might assume that an exhibition of Land Art would consist only of records of works rather than the works themselves, Long's photograph of his work is the work. Since his "action" is in the past the photograph is its sole embodiment.

That might seem rather an obscure point, but it sets the tone for an exhibition that contains a lot of black-and-white photographs and relatively few natural objects.

Long is Britain's best-known Land Artist and his Stone Circle, a perfect ring of purplish rocks from Portishead beach laid out on the gallery floor, represents the elegant, rarefied side of the form. The Boyle Family, on the other hand, stands for its dirty, urban aspect. Comprising artists Mark Boyle and Joan Hills and their children, they recreated random sections of the British landscape on gallery walls. Their Olaf Street Study, a square of brick-strewn waste ground, is one of the few works here to embrace the mundanity that characterizes most of our experience of the landscape most of the time.

Parks feature, particularly in the earlier works, such as John Hilliard's very funny Across the Park, in which a long-haired stroller is variously smiled at by a pretty girl and unwittingly assaulted in a sequence of images that turn out to be different parts of the same photograph.

Generally however British land artists preferred to get away from towns, gravitating towards landscapes that are traditionally considered beautiful such as the Lake District or the Wiltshire Downs. While it probably wasn't apparent at the time, much of this work is permeated by a spirit of romantic escapism that the likes of Wordsworth would have readily understood. Derek Jarman's yellow-tinted film Towards Avebury, a collection of long, mostly still shots of the Wiltshire landscape, evokes a tradition of English landscape painting stretching from Samuel Palmer to Paul Nash.

In the case of Hamish Fulton, you can't help feeling that the Scottish artist has simply found a way of making his love of walking pay. A typical work, such as Seven Days, consists of a single beautiful black-and-white photograph taken on an epic walk, with the mileage and number of days taken listed beneath. British Land Art as shown in this well selected, but relatively modestly scaled exhibition wasn't about imposing on the landscape, more a kind of landscape-orientated light conceptual art created passing through. It had its origins in the great outdoors, but the results were as gallery-bound as the paintings of Turner and Constable.

	[ A ] originates from a long walk that the artist took.
41. Stone Circle	[ B ] illustrates a kind of landscape-orientated light conceptual art.
42. Olaf Street Study	[ C ] reminds people of the English landscape painting tradition.
43. Across the Park	[ D ] represents the elegance of the British land art.
44. Towards Avebury	[ E ] depicts the ordinary side of the British land art.
45. Sever days	[ F ] embodies a romantic escape into the Scottish outdoors.
	[ G ] contains images from different parts of the same photograph.

Most people would define optimism as endlessly happy, with a glass that's perpetually half full. But that's exactly the kind of false cheerfulness that positive psychologists wouldn't recommend. "Healthy optimism means being in touch with reality," says Tal Ben-Shahar, a Harvard professor. According to Ben-Shahar, realistic optimists are these who make the best of things that happen, but not those who believe everything happens for the best.

Ben-Shahar uses three optimistic exercisers. When he feels down-say, after giving a bad lecture-he grants himself permission to be human. He reminds himself that not every lecture can be a Nobel winner; some will be less effective than others. Next is reconstruction. He analyzes the weak lecture, learning lessons for the future about what works and what doesn't. Finally, there is perspective, which involves acknowledging that in the ground scheme of life, one lecture really doesn't matter.

## Section IV Writing

### Part A

47. **Directions:** Suppose you are going to study abroad and share an apartment with John, a local student. Write him to email to

- 1) tell him about your living habits, and
- 2) ask for advice about living there.

You should write about 100 words on answer sheet.

**Do not** use your own name. Use “Li Ming” instead.

**Do not** write your address. (10 points)

### Part B

48. **Directions:**

Write your essay on the following chart. In your essay, You should

- 1) interpret the chart, and

Given the advantages of electronic money, you might think that we would move quickly to the cashless society in which all payments are made electronically. 1, a true cashless society is probably not around the corner. Indeed, predictions have been 2 for two decades but have not yet come to fruition. For example, Business Week predicted in 1975 that electronic means of payment would soon “revolutionize the very 3 of money itself,” only to 4 itself several years later. Why has the movement to a cashless society been so 5 in coming?

Although electronic means of payment may be more efficient than a payments system based on paper, several factors work 6 the disappearance of the paper system. First, it is very 7 to set up the computer, card reader, and telecommunications networks necessary to make electronic money the 8 form of payment. Second, paper checks have the advantage that they 9 receipts, something that many consumers are unwilling to 10. Third, the use of paper checks gives consumers several days of “float” – it takes several day 11 a check is cashed and funds are 12 from the issuer’s account, which means that the writer of the check can earn interest on the funds in the meantime. 13 electronic payments are immediate, they eliminate the float for the consumer.

Fourth, electronic means of payment may 14 security and privacy concerns. We often hear media reports that an unauthorized hacker has been able to access a computer database and to alter information 15 there. The fact that this is not an 16 occurrence means that dishonest persons might be able to access bank accounts in electronic payments systems and 17 from someone else’s accounts. The 18 of this type of fraud is no easy task, and a new field of computer science is developing to 19 security issues. A further concern is that the use of electronic means of pay-

ment leaves an electronic 20 that contains a large amount of personal data. There are concerns that government, employers, and marketers might be able to access these data, thereby violating our privacy.

| 18. [A] consideration | [B] prevention    | [C] manipulation | [D] justification |
| 19. [A] cope with     | [B] fight against | [C] adapt to     | [D] call for      |
| 20. [A] chunk         | [B] chip          | [C] path         | [D] trail         |

## Section II Reading Comprehension

### Part A

#### Directions:

Read the following four texts. Answer the questions below each text by choosing A, B, C or D. Mark your answers on the ANSWER SHEET. (40 points)

### Text 1

In an essay entitled “Making It in America”, the author Adam Davidson relates a joke from cotton country about just how much a modern textile mill has been automated: The average mill has only two employees today, “a man and a dog. The man is there to feed the dog, and the dog is there to keep the man away from the machines.”

Davidson’s article is one of a number of pieces that have recently appeared making the point that the reason we have such stubbornly high unemployment and declining middle-class incomes today is also because of the advances in both globalization and the information technology revolution, which are more rapidly than ever replacing labor with machines or foreign worker.

In the past, workers with average skills, doing an average job, could earn an average lifestyle. But, today, average is officially over. Being average just won’t earn you what it used to. It can’t when so many more employers have so much more access to so much more above average cheap foreign labor, cheap robotics, cheap software, cheap automation and cheap genius. Therefore, everyone needs to find their extra – their unique value contribution that makes them stand out in whatever is their field of employment.

Yes, new technology has been eating jobs forever, and always will. But there’s been acceleration. As Davidson notes, “In the 10 years ending in 2009, [ U.S. ] factories shed workers so fast that they erased almost all the gains of the previous 70 years; roughly one out of every three manufacturing jobs – about 6 million in total – disappeared.”

There will always be change – new jobs, new products, new services. But the one thing we know for sure is that with each advance in globalization and the I.T. revolution, the best jobs will require workers to have more and better education to make themselves above average.

In a world where average is officially over, there are many things we need to do to support employment, but nothing would be more important than passing some kind of G.I. Bill for the 21st century that ensures that every American has access to post-high school education.

21. The joke in Paragraph 1 is used to illustrate \_\_\_\_\_.

- [ A ] the impact of technological advances
- [ B ] the alleviation of job pressure
- [ C ] the shrinkage of textile mills
- [ D ] the decline of middle-class incomes

22. According to Paragraph 3, to be a successful employee, one has to \_\_\_\_\_.

- [ A ] work on cheap software

- ## Text 2

Crop pickers, violinists, construction workers, entrepreneurs, engineers, home health-care aides and physicists are among today's birds of passage. They are energetic participants in a global e-

economy driven by the flow of work, money and ideas. They prefer to come and go as opportunity calls them. They can manage to have a job in one place and a family in another.

With or without permission, they straddle laws, jurisdictions and identities with ease. We need them to imagine the United States as a place where they can be productive for a while without committing themselves to staying forever. We need them to feel that home can be both here and there and that they can belong to two nations honorably.

Accommodating this new world of people in motion will require new attitudes on both sides of the immigration battle. Looking beyond the culture war logic of right or wrong means opening up the middle ground and understanding that managing immigration today requires multiple paths and multiple outcomes. Including some that are not easy to accomplish legally in the existing system.

26. “Birds of passage” refers to those who \_\_\_\_\_.

- [ A ] immigrate across the Atlantic
- [ B ] leave their home countries for good
- [ C ] stay in a foreign temporarily
- [ D ] find permanent jobs overseas

27. It is implied in paragraph 2 that the current immigration system in the US \_\_\_\_\_.

- [ A ] needs new immigrant categories
- [ B ] has loosened control over immigrants
- [ C ] should be adopted to meet challenges
- [ D ] has been fixed via political means

28. According to the author, today’s birds of passage want \_\_\_\_\_.

- [ A ] financial incentives
- [ B ] a global recognition
- [ C ] opportunities to get regular jobs
- [ D ] the freedom to stay and leave

29. The author suggests that the birds of passage today should be treated \_\_\_\_\_.

- [ A ] as faithful partners
- [ B ] with economic favors
- [ C ] with regal tolerance
- [ D ] as mighty rivals

30. The most appropriate title for this text would be \_\_\_\_\_.

- [ A ] Come and go; big mistake
- [ B ] Living and thriving; great risk
- [ C ] With or without; great risk
- [ D ] Legal or illegal; big mistake

### Text 3

Scientists have found that although we are prone to snap overreactions, if we take a moment and think about how we are likely to react, we can reduce or even eliminate the negative effects of our quick, hard-wired responses.

Snap decisions can be important defense mechanisms; if we are judging whether someone is dangerous, our brains and bodies are hard-wired to react very quickly, within milliseconds. But we need more time to assess other factors. To accurately tell whether someone is sociable, studies show, we need at least a minute, preferably five. It takes a while to judge complex aspects of personality, like neuroticism or open-mindedness.

But snap decisions in reaction to rapid stimuli aren't exclusive to the interpersonal realm. Psychologists at the University of Toronto found that viewing a fast-food logo for just a few milliseconds primes us to read 20 percent faster, even though reading has little to do with eating. We unconsciously associate fast food with speed and impatience and carry those impulses into whatever else we're doing. Subjects exposed to fast-food flashes also tend to think a musical piece lasts too long.

Yet we can reverse such influences. If we know we will overreact to consumer products or housing options when we see a happy face (one reason good sales representatives and real estate agents are always smiling), we can take a moment before buying. If we know female job screeners are more likely to reject attractive female applicants, we can help screeners understand their biases-or hire outside screeners.

John Gottman, the marriage expert, explains that we quickly "thin slice" information reliably only after we ground such snap reactions in "thick sliced" long-term study. When Dr. Gottman really wants to assess whether a couple will stay together, he invites them to his island retreat for a much longer evaluation; two days, not two seconds.

Our ability to mute our hard-wired reactions by pausing is what differentiates us from animals: dogs can think about the future only intermittently or for a few minutes. But historically we have spent about 12 percent of our days contemplating the longer term. Although technology might change the way we react, it hasn't changed our nature. We still have the imaginative capacity to rise above temptation and reverse the high-speed trend.

31. The time needed in making decisions may \_\_\_\_\_.

- [A] vary according to the urgency of the situation
- [B] prove the complexity of our brain reaction
- [C] depend on the importance of the assessment

- [ D ] predetermine the accuracy of our judgment
32. **Our reaction to a fast-food logo shows that snap decisions** \_\_\_\_\_.  
 [ A ] can be associative [ B ] are not unconscious  
 [ C ] can be dangerous [ D ] are not impulsive
33. **To reverse the negative influences of snap decisions, we should** \_\_\_\_\_.  
 [ A ] trust our first impression  
 [ B ] do as people usually do  
 [ C ] think before we act  
 [ D ] ask for expert advice
34. **John Gottman says that reliable snap reactions are based on** \_\_\_\_\_.  
 [ A ] critical assessment [ B ] “thin sliced” study  
 [ C ] sensible explanation [ D ] adequate information
35. **The author’s attitude toward reversing the high-speed trend is** \_\_\_\_\_.  
 [ A ] tolerant [ B ] uncertain [ C ] optimistic [ D ] doubtful

#### Text 4

Europe is not a gender-equality heaven. In particular, the corporate workplace will never be completely family – friendly until women are part of senior management decisions, and Europe’s top corporate-governance positions remain overwhelmingly male. Indeed, women hold only 14 percent of positions on Europe corporate boards.

The Europe Union is now considering legislation to compel corporate boards to maintain a certain proportion of women – up to 60 percent. This proposed mandate was born of frustration. Last year, Europe Commission Vice President Viviane Reding issued a call to voluntary action. Reding invited corporations to sign up for gender balance goal of 40 percent female board membership. But her appeal was considered a failure; only 24 companies took it up.

Do we need quotas to ensure that women can continue to climb the corporate Ladder fairly as they balance work and family?

“Personally, I don’t like quotas,” Reding said recently. “But I like what the quotas do.” Quotas get action; they “open the way to equality and they break through the glass ceiling,” according to Reding, a result seen in France and other countries with legally binding provisions on placing women in top business positions.

I understand Reding’s reluctance – and her frustration. I don’t like quotas either; they run

counter to my belief in meritocracy, government by the capable. But, when one considers the obstacles to achieving the meritocratic ideal, it does look as if a fairer world must be temporarily ordered.

After all, four decades of evidence has now shown that corporations in Europe as the US are evading the meritocratic hiring and promotion of women to top position – no matter how much “soft pressure” is put upon them. When women do break through to the summit of corporate power – as, for example, Sheryl Sandberg recently did at Facebook – they attract massive attention precisely because they remain the exception to the rule.

If appropriate public policies were in place to help all women – whether CEOs or their children’s caregivers – and all families, Sandberg would be no more newsworthy than any other highly capable person living in a more just society.

36. In the European corporate workplace, generally \_\_\_\_\_.

- [ A ] women take the lead
- [ B ] men have the final say
- [ C ] corporate governance is overwhelmed
- [ D ] senior management is family-friendly

37. The European Union’s intended legislation is \_\_\_\_\_.

- [ A ] a reflection of gender balance
- [ B ] a reluctant choice
- [ C ] a response to Reding’s call
- [ D ] a voluntary action

38. According to Reding, quotas may help women \_\_\_\_\_.

- [ A ] get top business positions
- [ B ] see through the glass ceiling
- [ C ] balance work and family
- [ D ] anticipate legal results

39. The author’s attitude toward Reding’s appeal is one of \_\_\_\_\_.

- [ A ] skepticism
- [ B ] objectiveness
- [ C ] indifference
- [ D ] approval

40. Women entering top management become headlines due to the lack of \_\_\_\_\_.

- [ A ] more social justice
- [ B ] massive media attention
- [ C ] suitable public policies
- [ D ] greater “soft pressure”

## Part B

Read the following text and answer the questions by choosing the most suitable subtitle from the

list A-G for each numbered paragraph (41-45). There are two extra subtitles which you do not need to use. Mark your answers on ANSWER SHEET1. (10 points)

- [ A ] Live like a peasant
- [ B ] Balance your diet
- [ C ] Shopkeepers are your friends
- [ D ] Remember to treat yourself
- [ E ] Stick to what you need
- [ F ] Planning is everything
- [ G ] Waste not, want not

The hugely popular blog the Skint Foodie chronicles how Tony balances his love of good food with living on benefits. After bills, Tony has £ 60 a week to spend, £ 40 of which goes on food, but 10 years ago he was earning £ 130,000 a year working in corporate communications and eating at London's best restaurants at least twice a week. Then his marriage failed, his career burned out and his drinking became serious. "The community mental health team saved my life. And I felt like that again, to a certain degree, when people responded to the blog so well. It gave me the validation and confidence that I'd lost. But it's still a day-by-day thing." Now he's living in a council flat and field-ing offers from literary agents. He's feeling positive, but he'll carry on blogging – not about eating as cheaply as you can – "there are so many people in a much worse state, with barely any money to spend on food" – but eating well on a budget. Here's his advice for economical foodies.

41. \_\_\_\_\_

Impulsive spending isn't an option, so plan your week's menu in advance, making shopping lists for your ingredients in their exact quantities. I have an Excel template for a week of breakfast, lunch and dinner. Stop laughing; it's not just cost effective but helps you balance your diet. It's also a good idea to shop daily instead of weekly, because, being-human, you'll sometimes change your mind about what you fancy.

42. \_\_\_\_\_

This is where supermarkets and their anonymity come in handy. With them, there's not the same embarrassment as when buying one carrot in a little greengrocer. And if you plan properly, you'll know that you only need, say, 350g of shin of beef and six rashers of bacon, not whatever weight is pre-packed in the supermarket chiller.

43. \_\_\_\_\_

You may proudly claim to only have frozen peas in the freezer – that’s not good enough. Mine is filled with leftovers, bread, stock, meat and fish. Planning ahead should eliminate wastage, but if you have surplus vegetables you’ll do a vegetable soup, and all fruits threatening to “go off” will be cooked or juiced.

44. \_\_\_\_\_

Everyone says this, but it really is a top tip for frugal eaters. Shop at butchers, delis and fish-sellers regularly, even for small things, and be super friendly. Soon you’ll feel comfortable asking if they’ve any knuckles of ham for soups and stews, or beef bones, chicken carcasses and fish heads for stock which, more often than not, they’ll let you have for free.

45. \_\_\_\_\_

You won’t be eating out a lot, but save your pennies and once every few months treat yourself to a set lunch at a good restaurant – £ 1.75 a week for three months gives you £ 21 – more than enough for a three-course lunch at Michelin-starred Arbutus. It’s £ 16.95 there – or £ 12.99 for a large pizza from Domino’s; I know which I’d rather eat.

### Section III Translation

#### Directions:

Translate the following text from English into Chinese. Write your translation on the ANSWER SHEET. (15 points)

I can pick a date from the past 53 years and know instantly where I was, what happened in the news and even the day of the week. I’ve been able to do this, since I was four.

I never feel overwhelmed with the amount of information my brain absorbs. My mind seems to be able to cope and the information is stored away neatly. When I think of a sad memory, I do what everybody does – try to put it to one side. I don’t think it’s harder for me just because my memory is clearer. Powerful memory doesn’t make my emotions any more acute or vivid. I can recall the day my grandfather died and the sadness I felt when we went to the hospital the day before. I also remember that the musical play Hair opened on Broadway on the same day – they both just pop into my mind in the same way.

## Section IV Writing

47. **Directions:** Suppose your class is to hold a charity sale for kids in need of help. Write your classmates an email to

- 1) inform them about the details, and
- 2) encourage them to participate.

You should write about 100 words on the ANSWER SHEET.

**Do not** use your own name; use “Li Ming” instead.

**Do not** write your address. (10 points)

48. **Directions:** Write an essay based on the following chart. In your writing, you should

- 1) interpret the chart, and
- 2) give your comments.

You should write about 150 words on the ANSWER SHEET. (15 points)

## 2012 年全国硕士研究生入学统一考试英语(二)试题

## Section I Use of English

## Directions:

Read the following text. Choose the best word(s) for each numbered blank and mark A, B, C or D on ANSWER SHEET 1. (10 points)

Millions of Americans and foreigners see G. I. Joe as a mindless war toy, the symbol of American military adventurism, but that's not how it used to be. To the men and women who 1 in World War II and the people they liberated, the G. I. was the 2 man grown into hero, the poor farm kid torn away from his home, the guy who 3 all the burdens of battle, who slept in cold foxholes, who went without the 4 of food and shelter, who stuck it out and drove back the Nazi reign of murder. This was not a volunteer soldier, not someone well paid, 5 an average guy, up 6 the best trained, best equipped, fiercest, most brutal enemies in centuries.

His name isn't much. G. I. is just a military abbreviation 7 Government Issue, and it was on all of the articles 8 to soldiers. And Joe? A common name for a guy who never 9 it to the top. Joe Blow, Joe Palooka, Joe Magrac...a working class name. The United States has 10 had a president or vice-president or secretary of state Joe.

G. I. Joe had a 11 career fighting German, Japanese, and Korean troops. He appears as a character or a 12 of American personalities, in the 1945 movie The Story of G. I. Joe, based on the last days of war correspondent Ernie Pyle. Some of the soldiers Pyle 13 portrayed themselves in the film. Pyle was famous for covering the 14 side of the war, writing about the dirt-snow-and-mud soldiers, not how many miles were 15 or what towns were captured or liberated. His reports 16 the "Willie" cartoons of famed Stars and Stripes artist Bill Maulden. Both men 17 the dirt and exhaustion of war, the 18 of civilization that the soldiers shared with each other and the civilians: coffee, tobacco, whiskey, shelter, sleep. 19 Egypt, France, and a dozen more countries, G. I. Joe was any American soldier, 20 the most important person in their lives.

1. [ A ] performed                      [ B ] served                      [ C ] rebelled                      [ D ] betrayed
2. [ A ] actual                      [ B ] common                      [ C ] special                      [ D ] normal
3. [ A ] bore                      [ B ] eased                      [ C ] removed                      [ D ] loaded
4. [ A ] necessities                      [ B ] facilities                      [ C ] commodities                      [ D ] properties
5. [ A ] and                      [ B ] nor                      [ C ] but                      [ D ] hence
6. [ A ] for                      [ B ] into                      [ C ] from                      [ D ] against
7. [ A ] meaning                      [ B ] implying                      [ C ] symbolizing                      [ D ] claiming
8. [ A ] handed out                      [ B ] turned over                      [ C ] brought back                      [ D ] passed down
9. [ A ] pushed                      [ B ] got                      [ C ] made                      [ D ] managed
10. [ A ] ever                      [ B ] never                      [ C ] either                      [ D ] neither
11. [ A ] disguised                      [ B ] disturbed                      [ C ] disputed                      [ D ] distinguished

15. [ A ] ruined                      [ B ] commuted                      [ C ] patrolled                      [ D ] gained
16. [ A ] paralleled                      [ B ] counteracted                      [ C ] duplicated                      [ D ] contradicted
17. [ A ] neglected                      [ B ] avoided                      [ C ] emphasized                      [ D ] admired
18. [ A ] stages                      [ B ] illusions                      [ C ] fragments                      [ D ] advances
19. [ A ] With                      [ B ] To                      [ C ] Among                      [ D ] Beyond
20. [ A ] on the contrary                      [ B ] by this means                      [ C ] from the outset                      [ D ] at that point

## Section II Reading Comprehension

### Part A

#### Directions:

Read the following four texts. Answer the questions below each text by choosing A, B, C or D. Mark your answers on ANSWER SHEET 1. (40 points)

#### Text 1

Homework has never been terribly popular with students and even many parents, but in recent years it has been particularly scorned. School districts across the country, most recently Los Angeles

Unified, are revising their thinking on this educational ritual. Unfortunately, L.A. Unified has produced an inflexible policy which mandates that with the exception of some advanced courses, homework may no longer count for more than 10% of a student's academic grade.

This rule is meant to address the difficulty that students from impoverished or chaotic homes might have in completing their homework. But the policy is unclear and contradictory. Certainly, no homework should be assigned that students cannot complete on their own or that they cannot do without expensive equipment. But if the district is essentially giving a pass to students who do not do their homework because of complicated family lives, it is going riskily close to the implication that standards need to be lowered for poor children.

District administrators say that homework will still be a part of schooling; teachers are allowed to assign as much of it as they want. But with homework counting for no more than 10% of their grades, students can easily skip half their homework and see very little difference on their report cards. Some students might do well on state tests without completing their homework, but what about the students who performed well on the tests and did their homework? It is quite possible that the homework helped. Yet rather than empowering teachers to find what works best for their students, the policy imposes a flat, across-the-board rule.

At the same time, the policy addresses none of the truly thorny questions about homework. If the district finds homework to be unimportant to its students' academic achievement, it should move to reduce or eliminate the assignments, not make them count for almost nothing. Conversely, if homework matters, it should account for a significant portion of the grade. Meanwhile, this policy does nothing to ensure that the homework students receive is meaningful or appropriate to their age and the subject, or that teachers are not assigning more than they are willing to review and correct.

The homework rules should be put on hold while the school board, which is responsible for setting educational policy, looks into the matter and conducts public hearings. It is not too late for L.A. Unified to do homework right.

**21. It is implied in paragraph 1 that nowadays homework \_\_\_\_\_.**

- [ A ] is receiving more criticism
- [ B ] is no longer an educational ritual
- [ C ] is not required for advanced courses
- [ D ] is gaining more preferences

**22. L.A.Unified has made the rule about homework mainly because poor students \_\_\_\_\_.**

- [ A ] tend to have moderate expectations for their education

- [ B ] have asked for a different educational standard
- [ C ] may have problems finishing their homework
- [ D ] have voiced their complaints about homework
23. According to Paragraph 3, one problem with the policy is that it may \_\_\_\_\_.  
 [ A ] discourage students from doing homework  
 [ B ] result in students' indifference to their report cards  
 [ C ] undermine the authority of state tests  
 [ D ] restrict teachers' power in education
24. As mentioned in Paragraph 4, a key question unanswered about homework is whether \_\_\_\_\_.  
 [ A ] it should be eliminated [ B ] it counts much in schooling  
 [ C ] it places extra burdens on teachers [ D ] it is important for grades
25. A suitable title for this text could be \_\_\_\_\_.  
 [ A ] Wrong Interpretations of an Educational Policy  
 [ B ] A Welcomed Policy for Poor Students  
 [ C ] Thorny Questions about Homework  
 [ D ] A Faulty Approach to Homework

## Text 2

Pretty in pink: adult women do not remember being so obsessed with the colour, yet it is pervasive in our young girls' lives. It is not that pink is intrinsically bad, but it is such a tiny slice of the rainbow and, though it may celebrate girlhood in one way, it also repeatedly and firmly fuses girls' identity to appearance. Then it presents that connection, even among two-year-olds, between girls as not only innocent but as evidence of innocence. Looking around, I despaired at the singular lack of imagination about girls' lives and interests.

Girls' attraction to pink may seem unavoidable, somehow encoded in their DNA, but according to Jo Paoletti, an associate professor of American Studies, it is not. Children were not colour-coded at all until the early 20th century, in the era before domestic washing machines all babies wore white as a practical matter, since the only way of getting clothes clean was to boil them. What's more, both boys and girls wore what were thought of as gender-neutral dresses. When nursery colours were introduced, pink was actually considered the more masculine colour, a pastel version of red, which was associated with strength. Blue, with its intimations of the Virgin Mary, constancy and

faithfulness, symbolized femininity. It was not until the mid-1980s, when amplifying age and sex differences became a dominant children's marketing strategy, that pink fully came into its own, when it began to seem inherently attractive to girls, part of what defined them as female, at least for the first few critical years.

I had not realized how profoundly marketing trends dictated our perception of what is natural to kids, including our core beliefs about their psychological development. Take the toddler. I assumed that phase was something experts developed after years of research into children's behavior; wrong. Turns out, according to Daniel Cook, a historian of childhood consumerism, it was popularized as a marketing trick by clothing manufacturers in the 1930s.

Trade publications counseled department stores that, in order to increase sales, they should create a "third stepping stone" between infant wear and older kids' clothes. It was only after "toddler" became a common shoppers' term that it evolved into a broadly accepted developmental stage. Splitting kids, or adults, into ever-tinier categories has proved a sure-fire way to boost profits. And one of the easiest ways to segment a market is to magnify gender differences – or invent them where they did not previously exist.

26. By saying "it is ... the rainbow" (Line2, Para.1), the author means pink \_\_\_\_\_.

- [A] should not be the sole representation of girlhood
- [B] should not be associated with girls' innocence
- [C] cannot explain girls' lack of imagination
- [D] cannot influence girls' lives and interests

27. According to paragraph 2, which of the following is true of colours?

- [A] Colours are encoded in girls' DNA.
- [B] Blue used to be regarded as the colour for girls.
- [C] Pink used to be a neutral colour in symbolising genders.
- [D] White is preferred by babies.

28. The author suggests that our perception of children's psychological development was much influenced by \_\_\_\_\_.

- [A] the marketing of products for children
- [B] the observation of children's nature
- [C] researches into children's behaviour
- [D] studies of childhood consumption

29. We may learn from Paragraph 4 that department stores were advised to \_\_\_\_\_.

- [ A ] focus on infant wear and older kids' clothes
- [ B ] attach equal importance to different genders
- [ C ] classify consumers into smaller groups
- [ D ] create some common shoppers' terms

30. It can be concluded that girls' attraction to pink seems to be \_\_\_\_\_.

- [ A ] clearly explained by their inborn tendency
- [ B ] fully understood by clothing manufacturers
- [ C ] mainly imposed by profit-driven businessmen
- [ D ] well interpreted by psychological experts

### Text 3

In 2010, a federal judge shook America's biotech industry to its core. Companies had won patents for isolated DNA for decades – by 2005 some 20% of human genes were patented. But in March 2012 a judge ruled that genes were unpatentable. Executives were violently agitated. The Biotechnology Industry Organisation (BIO), a trade group, assured members that this was just a “preliminary step” in a longer battle.

On July 29th they were relieved, at least temporarily. A federal appeals court overturned the prior decision, ruling that Myriad Genetics could indeed hold patents to two genes that help forecast a woman's risk of breast cancer. The chief executive of Myriad, a company in Utah, said the ruling was a blessing to firms and patients alike.

But as companies continue their attempts at personalized medicine, the courts will remain rather busy. The Myriad case itself is probably not over. Critics make three main arguments against gene patents: a gene is a product of nature, so it may not be patented; gene patents suppress innovation rather than reward it; and patents monopolies restrict access to genetic tests such as Myriads. A growing number seem to agree. Last year a federal task-force urged reform for patents related to genetic tests. In October the Department of Justice filed a brief in the Myriad case, arguing that an isolated DNA molecule “is no less a product of nature...than are cotton fibres that have been separated from cotton seeds.”

Despite the appeals court's decision, big questions remain unanswered. For example, it is unclear whether the sequencing of a whole genome violates the patents of individual genes within it. The case may yet reach the Supreme Court.

As the industry advances, however, other suits may have an even greater impact. Companies are unlikely to file many more patents for human DNA molecules – most are unlikely patented or in the public domain. Firms are now studying how genes interact, looking for correlations that might be used to determine the causes of disease or predict a drug's efficacy. Companies are eager to win patents for “connecting the dots,” explains Hans Sauer, a lawyer for the BIO.

Their success may be determined by a suit related to this issue, brought by the Mayo Clinic, which the Supreme Court will hear in its next term. The BIO recently held a convention which included sessions to coach lawyer on the shifting landscape for patents. Each meeting was packed.

**31. It can be learned from Paragraph 1 that the biotech companies would like \_\_\_\_\_.**

- [ A ] their executives to be active
- [ B ] judges to rule out gene patenting
- [ C ] genes to be patentable
- [ D ] the BIO to issue a warning

**32. Those who are against gene patents believe that \_\_\_\_\_.**

- [ A ] genetic tests are not reliable
- [ B ] only man-made products are patentable
- [ C ] patents on genes depend much on innovation
- [ D ] courts should restrict access to genetic tests

**33. According to Hans Sauer , companies are eager to win patents for \_\_\_\_\_.**

- [ A ] establishing disease correlations
- [ B ] discovering gene interactions
- [ C ] drawing pictures of genes
- [ D ] identifying human DNA

**34. By saying ” Each meeting was packed ” ( Line 3, Para. 6 ), the author means that \_\_\_\_\_.**

- [ A ] the supreme court was authoritative
- [ B ] the BIO was a powerful organization
- [ C ] gene patenting was a great concern
- [ D ] lawyers were keen to attend conventions

**35. Generally speaking, the author's attitude toward gene patenting is \_\_\_\_\_.**

- [ A ] critical
- [ B ] supportive
- [ C ] scornful
- [ D ] objective

#### Text 4

The great recession may be over, but this era of high joblessness is probably beginning. Before

it ends, it will likely change the life course and character of a generation of young adults. And ultimately, it is likely to reshape our politics, our culture, and the character of our society for years.

No one tries harder than the jobless to find silver linings in this national economic disaster. Many said that unemployment, while extremely painful, had improved them in some ways: they had become less materialistic and more financially prudent; they were more aware of the struggles of others. In limited respects, perhaps the recession will leave society better off. At the very least, it has awoken us from our national fever dream of easy riches and bigger houses, and put a necessary end to an era of reckless personal spending.

But for the most part, these benefits seem thin, uncertain, and far off. In *The Moral Consequences of Economic Growth*, the economic historian Benjamin Friedman argues that both inside and outside the U.S., lengthy periods of economic stagnation or decline have almost always left society more mean-spirited and less inclusive, and have usually stopped or reversed the advance of rights and freedoms. Anti-immigrant sentiment typically increases, as does conflict between races and classes.

Income inequality usually falls during a recession, but it has not shrunk in this one. Indeed, this period of economic weakness may reinforce class divides, and decrease opportunities to cross them – especially for young people. The research of Till Von Wachter, the economic at Columbia University, suggests that not all people graduating into a recession see their life chances dimmed: those with degrees from elite universities catch up fairly quickly to where they otherwise would have been if they had graduated in better times; it is the masses beneath them that are left behind.

In the Internet age, it is particularly easy to see the resentment that has always been hidden within American society. More difficult, in the moment, is discerning precisely how these lean times are affecting society's character. In many respects, the U.S. was more socially tolerant entering this recession than at any time in its history, and a variety of national polls on social conflict since then have shown mixed results. We will have to wait and see exactly how these hard times will reshape our social fabric. But they certainly will reshape it, and all the more so the longer they extend.

**36. By saying “to find silver linings” (Line 1, Para.2) the author suggests that the jobless try to \_\_\_\_\_.**

- [ A ] seek subsidies from the government
- [ B ] explore reasons for the unemployment
- [ C ] make profits from the troubled economy

- [ D ] look on the bright side of the recession
37. **According to Paragraph 2, the recession has made people \_\_\_\_\_.**
- [ A ] realize the national dream                      [ B ] struggle against each other
- [ C ] challenge their prudence                      [ D ] reconsider their lifestyle
38. **Benjamin Friedman believes that economic recessions may \_\_\_\_\_.**
- [ A ] impose a heavier burden on immigrants
- [ B ] bring out more evils of human nature
- [ C ] promote the advance of rights and freedoms
- [ D ] ease conflicts between races and classes
39. **The research of Till Von Wachter suggests that in the recession graduates from elite universities tend to \_\_\_\_\_.**
- [ A ] lag behind the others due to decreased opportunities
- [ B ] catch up quickly with experienced employees
- [ C ] see their life chances as dimmed as the others'
- [ D ] recover more quickly than the others
40. **The author thinks that the influence of hard times on society is \_\_\_\_\_.**
- [ A ] certain                      [ B ] positive                      [ C ] trivial                      [ D ] destructive

Read the following text and answer the questions by finding information from the right column that corresponds to each of the marked details given in the left column. There are two extra choices in the right column. Mark your answers on ANSWER SHEET 1. ( 10 points)

“Universal history, the history of what man has accomplished in this world, is at bottom the History of the Great Men who have worked here,” wrote the Victorian Thomas Carlyle. Well, not any more it is not.

Suddenly, Britain looks to have fallen out with its favorite historical form. This could be no more than a passing literary craze, but it also points to a broader truth about how we now approach the past: less concerned with learning from forefathers and more interested in feeling their pain. To-day, we want empathy, not inspiration.

From the earliest days of the Renaissance, the writing of history meant recounting the exemplary

lives of great men. In 1337, Petrarch began work on his rambling writing *De Viris Illustribus* – On Famous Men, highlighting the *virtus* (or virtue) of classical heroes. Petrarch celebrated their greatness in conquering fortune and rising to the top. This was the biographical tradition which Niccolo Machiavelli turned on its head. In *The Prince*, he championed cunning, ruthlessness, and boldness, rather than virtue, mercy and justice, as the skills of successful leaders.

Over time, the attributes of greatness shifted. The Romantics commemorated the leading painters and authors of their day, stressing the uniqueness of the artist's personal experience rather than public glory. By contrast, the Victorian author Samuel Smiles wrote *Self-Help* as a catalogue of the worthy lives of engineers, industrialists and explorers. "The valuable examples which they furnish of the power of self-help, of patient purpose, resolute working and steadfast integrity, issuing in the formation of truly noble and manly character, exhibit," wrote Smiles, "what it is in the power of each to accomplish for himself." His biographies of James Watt, Richard Arkwright and Josian Wedgwood were held up as beacons to guide the working man through his difficult life.

This was all a bit bourgeois for Thomas Carlyle, who focused his biographies on the truly heroic lives of Martin Luther, Oliver Cromwell and Napoleon Bonaparte. These epochal figures represented lives hard to imitate, but to be acknowledged as possessing higher authority than mere mortals.

Not everyone was convinced by such bombast. "The history of all hitherto existing society is the history of class struggles," wrote Marx and Engels in *The Communist Manifesto*. For them, history did nothing, it possessed no immense wealth nor waged battles: "It is man, real, living man who does all that." And history should be the story of the masses and their record of struggle, As such, it needed to appreciate the economic realities, the social contexts and power relations in which each epoch stood. For: "Men make their own history, but they do not make it just as they please; they do not make it under circumstances chosen by themselves, but under circumstances directly found, given and transmitted from the past."

This was the tradition which revolutionized our appreciation of the past. In place of Thomas Carlyle, Britain nurtured Christopher Hill, EP Thompson and Eric Hobsbawm. History from below stood alongside biographies of great men. Whole new realms of understanding – from gender to race to cultural studies – were opened up as scholars unpicked the multiplicity of lost societies. And it transformed public history too: downstairs became just as fascinating as upstairs.

	[ A ] emphasized the virtue of classical heroes
41. Petrarch	[ B ] highlighted the public glory of the leading artists.
42. Niccolò Machiavelli	[ C ] focused on epochal figures whose lives were hard to imitate.
43. Samuel Smiles	[ D ] opened up new realms of understanding the great men in history.
44. Thomas Carlyle	[ E ] held that history should be the story of the masses and their record of struggle.
45. Marx and Engels	[ F ] dismissed virtue as unnecessary for successful leaders.
	[ G ] depicted the worthy lives of engineers , industrialists and explorers.

### Section III Translation

#### 46. Directions:

Translate the following text from English into Chinese. Write your translation on ANSWER SHEET 2. ( 15 points)

When people in developing countries worry about migration , they are usually concerned at the prospect of their best and brightest departure to Silicon Valley or to hospitals and universities in developed world. These are the kind of workers that countries like Britain , Canada and Australia try to attract by using immigration rules that privilege college graduates.

Lots of studies have found that well-educated people from developing countries are particularly likely to emigrate. A big survey of Indian households in 2004 found that nearly 40% of emigrants had more than a high-school education , compared with around 3.3% of all Indians over the age 25. This “brain drain” has long bothered policymakers in poor countries. They fear that it hurts their economies , depriving them of much-needed skilled workers who could have taught at their universities , worked in their hospitals and come up with clever new products for their factories to make.

Section IV Writing

Part A

47. Directions:

Suppose you have found something wrong with the electronic dictionary that you bought from an online store the other day. Write an email to the customer service center to

- 1) make a complaint, and
- 2) demand a prompt solution.

You should write about 100 words on ANSWER SHEET 2.

**Do not** sign your own name at the end of the letter. Use “Zhang Wei” instead.

**Do not** write the address. (10 points)

Part B

48. Directions:

Write an essay based on the following table. In your writing, you should

- 1) describe the table, and
- 2) give your comments.

You should write at least 150 words.

Write your essay on ANSWER SHEET 2. (15point)

某公司员工工作满意度调查

<div>满意度</div> <div>年龄组</div>	满意	不清楚	不满意
≤40 岁	16.7%	50.0%	33.3%
40 – 50 岁	0.0%	36.0%	64.0%
>50 岁	40.0%	50.0%	10.0%

## Section I Use of English

## Directions:

Read the following text. Choose the best word (s) for each numbered blank and mark [A], [B], [C] or [D] on ANSWER SHEET 1. (10 points)

The Internet affords anonymity to its users – a blessing to privacy and freedom of speech. But that very anonymity is also behind the explosion of cyber-crime that has 1 across the Web.

Can privacy be preserved 2 bringing safety and security to a world that seems increasingly 3 ?

Last month, Howard Schmidt, the nation's cyber-czar, offered the federal government a 4 to make the Web a safer place – a “voluntary trusted identity” system that would be the high-tech 5 of a physical key, a fingerprint and a photo ID card, all rolled 6 one. The system might use a smart identity card, or a digital credential 7 to a specific computer, and would authenticate users at a range of online services.

The idea is to 8 a federation of private online identity systems. Users could 9 which system to join, and only registered users whose identities have been authenticated could navigate those systems. The approach contrasts with one that would require an Internet driver's license 10 by the government.

Google and Microsoft are among companies that already have these “single sign-on” systems that make it possible for users to 11 just once but use many different services.

12, the approach would create a “walled garden” in cyberspace, with safe “neighborhoods” and bright “streetlights” to establish a sense of a 13 community.

Mr. Schmidt described it as a “voluntary ecosystem” in which “individuals and organizations can complete online transactions with 14, trusting the identities of each other and the identities of the infrastructure 15 which the transaction runs.”

Still, the administration's plan has 16 privacy rights activists. Some applaud the approach;

others are concerned. It seems clear that such a scheme is an initiative push toward what would 17 be a compulsory Internet “driver’s license” mentality.

The plan has also been greeted with 18 by some computer security experts, who worry that the “voluntary ecosystem” envisioned by Mr. Schmidt would still leave much of the Internet 19. They argue that all Internet users should be 20 to register and identify themselves, in the same way that drivers must be licensed to drive on public roads.

## Section II Reading Comprehension

### Part A

#### Directions:

Read the following four texts. Answer the questions after each text by choosing [ A ], [ B ], [ C ] or [ D ]. Mark your answers on ANSWER SHEET 1. (40 points)

### Text 1

Ruth Simmons joined Goldman Sachs's board as an outside director in January 2000; a year later she became president of Brown University. For the rest of the decade she apparently managed both roles without attracting much criticism. But by the end of 2009 Ms. Simmons was under fire for having sat on Goldman's compensation committee; how could she have let those enormous bonus payouts pass unremarked? By February the next year Ms. Simmons had left the board. The position was just taking up too much time, she said.

Outside directors are supposed to serve as helpful, yet less biased, advisers on a firm's board. Having made their wealth and their reputations elsewhere, they presumably have enough independence to disagree with the chief executive's proposals. If the sky, and the share price, is falling, outside directors should be able to give advice based on having weathered their own crises.

The researchers from Ohio University used a database that covered more than 10,000 firms and more than 64,000 different directors between 1989 and 2004. Then they simply checked which directors stayed from one proxy statement to the next. The most likely reason for departing a board was age, so the researchers concentrated on those "surprise" disappearances by directors under the age of 70. They found that after a surprise departure, the probability that the company will subsequently have to restate earnings increases by nearly 20%. The likelihood of being named in a federal class-action lawsuit also increases, and the stock is likely to perform worse. The effect tended to be larger for larger firms. Although a correlation between them leaving and subsequent bad performance at the firm is suggestive, it does not mean that such directors are always jumping off a sinking ship. Often they "trade up," leaving riskier, smaller firms for larger and more stable firms.

But the researchers believe that outside directors have an easier time of avoiding a blow to their reputations if they leave a firm before bad news breaks, even if a review of history shows they were on the board at the time any wrongdoing occurred. Firms who want to keep their outside directors through tough times may have to create incentives. Otherwise outside directors will follow the example of Ms. Simmons, once again very popular on campus.

21. According to Paragraph 1, Ms. Simmons was criticized for \_\_\_\_\_.

[ A ] gaining excessive profits

[ B ] failing to fulfill her duty

[ C ] refusing to make compromises

[ D ] leaving the board in tough times

22. We learn from Paragraph 2 that outside directors are supposed to be \_\_\_\_\_.  
 [ A ] generous investors  
 [ B ] unbiased executives  
 [ C ] share price forecasters  
 [ D ] independent advisers
23. According to the researchers from Ohio University, after an outside director's surprise departure, the firm is likely to \_\_\_\_\_.  
 [ A ] become more stable  
 [ B ] report increased earnings  
 [ C ] do less well in the stock market  
 [ D ] perform worse in lawsuits
24. It can be inferred from the last paragraph that outside directors \_\_\_\_\_.  
 [ A ] may stay for the attractive offers from the firm  
 [ B ] have often had records of wrongdoings in the firm  
 [ C ] are accustomed to stress-free work in the firm  
 [ D ] will decline incentives from the firm
25. The author's attitude toward the role of outside directors is \_\_\_\_\_.  
 [ A ] permissive                      [ B ] positive                      [ C ] scornful                      [ D ] critical

## Text 2

Whatever happened to the death of newspapers? A year ago the end seemed near. The recession threatened to remove the advertising and readers that had not already fled to the Internet. Newspapers like the San Francisco Chronicle were chronicling their own doom. America's Federal Trade Commission launched a round of talks about how to save newspapers. Should they become charitable corporations? Should the state subsidize them? It will hold another meeting soon. But the discussions now seem out of date.

In much of the world there is little sign of crisis. German and Brazilian papers have shrugged off the recession. Even American newspapers, which inhabit the most troubled corner of the global industry, have not only survived but often returned to profit. Not the 20% profit margins that were routine a few years ago, but profit all the same.

It has not been much fun. Many papers stayed afloat by pushing journalists overboard. The American Society of News Editors reckons that 13,500 newsroom jobs have gone since 2007. Readers

are paying more for slimmer products. Some papers even had the nerve to refuse delivery to distant suburbs. Yet these desperate measures have proved the right ones and, sadly for many journalists, they can be pushed further.

Newspapers are becoming more balanced businesses, with a healthier mix of revenues from readers and advertisers. American papers have long been highly unusual in their reliance on ads. Fully 87% of their revenues came from advertising in 2008, according to the Organization for Economic Cooperation & Development (OECD). In Japan the proportion is 35%. Not surprisingly, Japanese newspapers are much more stable.

The whirlwind that swept through newsrooms harmed everybody, but much of the damage has been concentrated in areas where newspapers are least distinctive. Car and film reviewers have gone. So have science and general business reporters. Foreign bureaus have been savagely cut off. Newspapers are less complete as a result. But completeness is no longer a virtue in the newspaper business.

**26. By saying “Newspapers like ... their own doom” (Lines 2-3, Para. 1), the author indicates that newspapers \_\_\_\_\_.**

- [A] neglected the sign of crisis
- [B] failed to get state subsidies
- [C] were not charitable corporations
- [D] were in a desperate situation

**27. Some newspapers refused delivery to distant suburbs probably because \_\_\_\_\_.**

- [A] readers threatened to pay less
- [B] newspapers wanted to reduce costs
- [C] journalists reported little about these areas
- [D] subscribers complained about slimmer products

**28. Compared with their American counterparts, Japanese newspapers are much more stable because they \_\_\_\_\_.**

- [A] have more sources of revenue
- [B] have more balanced newsrooms
- [C] are less dependent on advertising
- [D] are less affected by readership

**29. What can be inferred from the last paragraph about the current newspaper business?**

- [A] Distinctiveness is an essential feature of newspapers.

- [ B ] Completeness is to blame for the failure of newspapers.
- [ C ] Foreign bureaus play a crucial role in the newspaper business.
- [ D ] Readers have lost their interest in car and film reviews.

30. The most appropriate title for this text would be \_\_\_\_\_.

- [ A ] American Newspapers: Struggling for Survival
- [ B ] American Newspapers: Gone with the Wind
- [ C ] American Newspapers: A Thriving Business
- [ D ] American Newspapers: A Hopeless Story

### Text 3

We tend to think of the decades immediately following World War II as a time of prosperity and growth, with soldiers returning home by the millions, going off to college on the G. I. Bill and lining up at the marriage bureaus.

But when it came to their houses, it was a time of common sense and a belief that less could truly be more. During the Depression and the war, Americans had learned to live with less, and that restraint, in combination with the postwar confidence in the future, made small, efficient housing positively stylish.

Economic condition was only a stimulus for the trend toward efficient living. The phrase “less is more” was actually first popularized by a German, the architect Ludwig Mies van der Rohe, who like other people associated with the Bauhaus, a school of design, emigrated to the United States before World War II and took up posts at American architecture schools. These designers came to exert enormous influence on the course of American architecture, but none more so than Mies.

Mies’s signature phrase means that less decoration, properly organized, has more impact than a lot. Elegance, he believed, did not derive from abundance. Like other modern architects, he employed metal, glass and laminated wood – materials that we take for granted today but that in the 1940s symbolized the future. Mies’s sophisticated presentation masked the fact that the spaces he designed were small and efficient, rather than big and often empty.

The apartments in the elegant towers Mies built on Chicago’s Lake Shore Drive, for example, were smaller – two-bedroom units under 1,000 square feet – than those in their older neighbors along the city’s Gold Coast. But they were popular because of their airy glass walls, the views they afforded and the elegance of the buildings’ details and proportions, the architectural equivalent of the abstract art so popular at the time.

The trend toward “less” was not entirely foreign. In the 1930s Frank Lloyd Wright started building more modest and efficient houses – usually around 1,200 square feet – than the spreading two-story ones he had designed in the 1890s and the early 20th century.

The “Case Study Houses” commissioned from talented modern architects by California Arts & Architecture magazine between 1945 and 1962 were yet another homegrown influence on the “less is more” trend. Aesthetic effect came from the landscape, new materials and forthright detailing. In his Case Study House, Ralph Rapson may have mispredicted just how the mechanical revolution would impact everyday life – few American families acquired helicopters, though most eventually got clothes dryers – but his belief that self-sufficiency was both desirable and inevitable was widely shared.

31. **The postwar American housing style largely reflected the Americans’ \_\_\_\_\_.**

- [ A ] prosperity and growth
- [ B ] efficiency and practicality
- [ C ] restraint and confidence
- [ D ] pride and faithfulness

32. **Which of the following can be inferred from Paragraph 3 about Bauhaus?**

- [ A ] It was founded by Ludwig Mies van der Rohe.
- [ B ] Its designing concept was affected by World War II.
- [ C ] Most American architects used to be associated with it.
- [ D ] It had a great influence upon American architecture.

33. **Mies held that elegance of architectural design \_\_\_\_\_.**

- [ A ] was related to large space
- [ B ] was identified with emptiness
- [ C ] was not reliant on abundant decoration
- [ D ] was not associated with efficiency

34. **What is TRUE about the apartments Mies built on Chicago’s Lake Shore Drive?**

- [ A ] They ignored details and proportions.
- [ B ] They were built with materials popular at that time.
- [ C ] They were more spacious than neighboring buildings.
- [ D ] They shared some characteristics of abstract art.

35. **What can we learn about the design of the “Case Study House”?**

- [ A ] Mechanical devices were widely used.
- [ B ] Natural scenes were taken into consideration.
- [ C ] Details were sacrificed for the overall effect.
- [ D ] Eco-friendly materials were employed.

#### Text 4

Will the European Union make it? The question would have sounded strange not long ago. Now even the project's greatest cheerleaders talk of a continent facing a "Bermuda triangle" of debt, population decline and lower growth.

As well as those chronic problems, the EU faces an acute crisis in its economic core, the 16 countries that use the single currency. Markets have lost faith that the euro zone's economies, weaker or stronger, will one day converge thanks to the discipline of sharing a single currency, which denies uncompetitive members the quick fix of devaluation.

Yet the debate about how to save Europe's single currency from disintegration is stuck. It is stuck because the euro zone's dominant powers, France and Germany, agree on the need for greater harmonization within the euro zone, but disagree about what to harmonise.

Germany thinks the euro must be saved by stricter rules on borrowing, spending and competitiveness, backed by quasi-automatic sanctions for governments that do not obey. These might include threats to freeze EU funds for poorer regions and EU mega-projects, and even the suspension of a country's voting rights in EU ministerial councils. It insists that economic co-ordination should involve all 27 members of the EU club, among whom there is a small majority for free-market liberalism and economic rigour; in the inner core alone, Germany fears, a small majority favour French interference.

A "southern" camp headed by France wants something different: "European economic government" within an inner core of euro-zone members. Translated, that means politicians intervening in monetary policy and a system of redistribution from richer to poorer members, via cheaper borrowing for governments through common Eurobonds or complete fiscal transfers. Finally, figures close to the French government have murmured, euro-zone members should agree to some fiscal and social harmonization: e.g., curbing competition in corporate-tax rates or labour costs.

It is too soon to write off the EU. It remains the world's largest trading block. At its best, the European project is remarkably liberal: built around a single market of 27 rich and poor countries, its internal borders are far more open to goods, capital and labour than any comparable trading area. It is an ambitious attempt to blunt the sharpest edges of globalization, and make capitalism benign.

36. The EU is faced with so many problems that \_\_\_\_\_.

[A] it has more or less lost faith in markets

- [ B ] even its supporters begin to feel concerned
- [ C ] some of its member countries plan to abandon euro
- [ D ] it intends to deny the possibility of devaluation

37. The debate over the EU's single currency is stuck because the dominant powers \_\_\_\_\_.

- [ A ] are competing for the leading position
- [ B ] are busy handling their own crises
- [ C ] fail to reach an agreement on harmonization
- [ D ] disagree on the steps towards disintegration

38. To solve the euro problem, Germany proposed that \_\_\_\_\_.

- [ A ] EU funds for poor regions be increased
- [ B ] stricter regulations be imposed
- [ C ] only core members be involved in economic co-ordination
- [ D ] voting rights of the EU members be guaranteed

39. The French proposal of handling the crisis implies that \_\_\_\_\_.

- [ A ] poor countries are more likely to get funds
- [ B ] strict monetary policy will be applied to poor countries
- [ C ] loans will be readily available to rich countries
- [ D ] rich countries will basically control Eurobonds

40. Regarding the future of the EU, the author seems to feel \_\_\_\_\_.

- [ A ] pessimistic
- [ B ] desperate
- [ C ] conceited
- [ D ] hopeful

Leading doctors today weigh in on the debate over the government's role in promoting public health by demanding that ministers impose "fat taxes" on unhealthy food and introduce cigarette-style warnings to children about the dangers of a poor diet.

The demands follow comments made last week by the health secretary, Andrew Lansley, who

insisted the government could not force people to make healthy choices and promised to free businesses from public health regulations.

But senior medical figures want to stop fast-food outlets opening near schools, restrict advertising of products high in fat, salt or sugar, and limit sponsorship of sports events by fast-food producers such as McDonald's.

They argue that government action is necessary to curb Britain's addiction to unhealthy food and help halt spiralling rates of obesity, diabetes and heart disease. Professor Terence Stephenson, president of the Royal College of Paediatrics and Child Health, said that the consumption of unhealthy food should be seen to be just as damaging as smoking or excessive drinking.

"Thirty years ago, it would have been inconceivable to have imagined a ban on smoking in the workplace or in pubs, and yet that is what we have now. Are we willing to be just as courageous in respect of obesity? I would suggest that we should be," said the leader of the UK's children's doctors.

Lansley has alarmed health campaigners by suggesting he wants industry rather than government to take the lead. He said that manufacturers of crisps and candies could play a central role in the Change4Life campaign, the centrepiece of government efforts to boost healthy eating and fitness. He has also criticised the celebrity chef Jamie Oliver's high-profile attempt to improve school lunches in England as an example of how "lecturing" people was not the best way to change their behaviour.

Stephenson suggested potential restrictions could include banning TV advertisements for foods high in fat, salt or sugar before 9 pm and limiting them on billboards or in cinemas. "If we were really bold, we might even begin to think of high-calorie fast food in the same way as cigarettes – by setting strict limits on advertising, product placement and sponsorship of sports events," he said.

Such a move could affect firms such as McDonald's, which sponsors the youth coaching scheme run by the Football Association. Fast-food chains should also stop offering "inducements" such as toys, cute animals and mobile phone credit to lure young customers, Stephenson said.

Professor Dinesh Bhugra, president of the Royal College of Psychiatrists, said: "If children are taught about the impact that food has on their growth, and that some things can harm, at least information is available up front."

He also urged councils to impose "fast-food-free zones" around schools and hospitals – areas within which takeaways cannot open.

A Department of Health spokesperson said: "We need to create a new vision for public health where all of society works together to get healthy and live longer. This includes creating a new 're-

sponsibility deal' with business, built on social responsibility, not state regulation. Later this year, we will publish a white paper setting out exactly how we will achieve this."

The food industry will be alarmed that such senior doctors back such radical moves, especially the call to use some of the tough tactics that have been deployed against smoking over the last decade.

	[ A ] "fat taxes" should be imposed on fast-food producers such as McDonald's.
41. Andrew Lansley held that	[ B ] the government should ban fast-food outlets in the neighborhood of schools.
42. Terence Stephenson agreed that	[ C ] "lecturing" was an effective way to improve school lunches in England.
43. Jamie Oliver seemed to believe that	[ D ] cigarette-style warnings should be introduced to children about the dangers of a poor diet.
44. Dinesh Bhugra suggested that	[ E ] the producers of crisps and candies could contribute significantly to the Change4Life campaign.
45. A Department of Health Spokesperson proposed that	[ F ] parents should set good examples for their children by keeping a healthy diet at home.
	[ G ] the government should strengthen the sense of responsibility among businesses.

Who would have thought that, globally, the IT industry produces about the same volume of greenhouse gases as the world's airlines do – roughly 2 percent of all CO<sub>2</sub> emissions?

Many everyday tasks take a surprising toll on the environment. A Google search can leak between 0.2 and 7.0 grams of CO<sub>2</sub>, depending on how many attempts are needed to get the "right" answer. To deliver results to its users quickly, then, Google has to maintain vast data centres around

the world, packed with powerful computers. While producing large quantities of CO<sub>2</sub>, these computers emit a great deal of heat, so the centres need to be well air-conditioned, which uses even more energy.

However, Google and other big tech providers monitor their efficiency closely and make improvements. Monitoring is the first step on the road to reduction, but there is much more to be done, and not just by big companies.

## Section IV Writing

### Part A

#### 47. Directions:

Suppose your cousin Li Ming has just been admitted to a university. Write him/ her a letter to

- 1) congratulate him/ her, and
- 2) give him/ her suggestions on how to get prepared for university life.

You should write about 100 words on ANSWER SHEET 2.

**Do not** sign your own name at the end of the letter. Use “Zhang Wei” instead.

**Do not** write the address. (10 points)

The outbreak of swine flu that was first detected in Mexico was declared a global epidemic on June 11, 2009. It is the first worldwide epidemic 1 by the World Health Organization in 41 years.

The heightened alert 2 an emergency meeting with flu experts in Geneva that assembled after a sharp rise in cases in Australia, and rising 3 in Britain, Japan, Chile and elsewhere.

But the epidemic is “ 4 ” in severity, according to Margaret Chan, the organization’s director general, 5 the overwhelming majority of patients experiencing only mild symptoms and a full recovery, often in the 6 of any medical treatment.

The outbreak came to global 7 in late April 2009, when Mexican authorities noted an unusually large number of hospitalizations and deaths 8 healthy adults. As much of Mexico City shut down at the height of a panic, cases began to 9 in New York City, the southwestern United States and around the world.

In the United States, new cases seemed to fade 10 warmer weather arrived. But in late September 2009, officials reported there was 11 flu activity in almost every state and that virtually all the 12 tested are the new swine flu, also known as (A) H1N1, not seasonal flu. In the U.S., it has 13 more than one million people, and caused more than 600 deaths and more than 6,000 hospitalizations.

Federal health officials 14 Tamiflu for children from the national stockpile and began 15 orders from the states for the new swine flu vaccine. The new vaccine, which is different from the annual flu vaccine, is 16 ahead of expectations. More than three million doses were to be made available in early October 2009, though most of those 17 doses were of the FluMist nasal spray type, which is not 18 for pregnant women, people over 50 or those with breathing

difficulties, heart disease or several other 19. But it was still possible to vaccinate people in other high-risk groups: health care workers, people 20 infants and healthy young people.

## Section II Reading Comprehension

### Part A

#### Directions:

Read the following four texts. Answer the questions after each text by choosing [A], [B], [C] or [D]. Mark your answers on ANSWER SHEET 1. (40 points)

### Text 1

The longest bull run in a century of art-market history ended on a dramatic note with a sale of 56 works by Damien Hirst, *Beautiful Inside My Head Forever*, at Sotheby's in London on September 15th 2008. All but two pieces sold, fetching more than £ 70m, a record for a sale by a single artist. It was a last victory. As the auctioneer called out bids, in New York one of the oldest banks on Wall Street, Lehman Brothers, filed for bankruptcy.

The world art market had already been losing momentum for a while after rising bewilderingly since 2003. At its peak in 2007 it was worth some \$ 65 billion, reckons Clare McAndrew, founder of Arts Economics, a research firm – double the figure five years earlier. Since then it may have come down to \$ 50 billion. But the market generates interest far beyond its size because it brings together great wealth, enormous egos, greed, passion and controversy in a way matched by few other industries.

In the weeks and months that followed Mr. Hirst's sale, spending of any sort became deeply unfashionable. In the art world that meant collectors stayed away from galleries and salerooms. Sales of contemporary art fell by two-thirds, and in the most overheated sector, they were down by nearly 90% in the year to November 2008. Within weeks the world's two biggest auction houses, Sotheby's and Christie's, had to pay out nearly \$ 200m in guarantees to clients who had placed works for sale with them.

The current downturn in the art market is the worst since the Japanese stopped buying Impressionists at the end of 1989. This time experts reckon that prices are about 40% down on their peak on average, though some have been far more fluctuant. But Edward Dolman, Christie's chief executive, says: "I'm pretty confident we're at the bottom."

What makes this slump different from the last, he says, is that there are still buyers in the market. Almost everyone who was interviewed for this special report said that the biggest problem at the moment is not a lack of demand but a lack of good work to sell. The three Ds – death, debt and divorce – still deliver works of art to the market. But anyone who does not have to sell is keeping away, waiting for confidence to return.

**21. In the first paragraph, Damien Hirst's sale was referred to as "a last victory" because \_\_\_\_\_.**

- [ A ] the art market had witnessed a succession of victories
- [ B ] the auctioneer finally got the two pieces at the highest bids
- [ C ] *Beautiful Inside My Head Forever* won over all masterpieces
- [ D ] it was successfully made just before the world financial crisis

22. By saying “spending of any sort became deeply unfashionable” (Para. 3), the author suggests that \_\_\_\_\_.
- [A] collectors were no longer actively involved in art-market auctions
  - [B] people stopped every kind of spending and stayed away from galleries
  - [C] art collection as a fashion had lost its appeal to a great extent
  - [D] works of art in general had gone out of fashion so they were not worth buying
23. Which of the following statements is NOT true?
- [A] Sales of contemporary art fell dramatically from 2007 to 2008.
  - [B] The art market surpassed many other industries in momentum.
  - [C] The art market generally went downward in various ways.
  - [D] Some art dealers were awaiting better chances to come.
24. The three Ds mentioned in the last paragraph are \_\_\_\_\_.
- [A] auction houses' favorites
  - [B] contemporary trends
  - [C] factors promoting artwork circulation
  - [D] styles representing Impressionists
25. The most appropriate title for this text could be \_\_\_\_\_.
- [A] Fluctuation of Art Prices
  - [B] Up-to-date Art Auctions
  - [C] Art Market in Decline
  - [D] Shifted Interest in Arts

## Text 2

I was addressing a small gathering in a suburban Virginia living room – a women's group that had invited men to join them. Throughout the evening, one man had been particularly talkative, frequently offering ideas and anecdotes, while his wife sat silently beside him on the couch. Toward the end of the evening, I commented that women frequently complain that their husbands don't talk to them. This man quickly nodded in agreement. He gestured toward his wife and said, “She's the talker in our family.” The room burst into laughter; the man looked puzzled and hurt. “It's true,” he explained. “When I come home from work I have nothing to say. If she didn't keep the conversation going, we'd spend the whole evening in silence.”

This episode crystallizes the irony that although American men tend to talk more than women in public situations, they often talk less at home. And this pattern is wreaking havoc with marriage.

The pattern was observed by political scientist Andrew Hacker in the late 1970s. Sociologist

Catherine Kohler Riessman reports in her new book *Divorce Talk* that most of the women she interviewed – but only a few of the men – gave lack of communication as the reason for their divorces. Given the current divorce rate of nearly 50 percent, that amounts to millions of cases in the United States every year – a virtual epidemic of failed conversation.

In my own research, complaints from women about their husbands most often focused not on tangible inequities such as having given up the chance for a career to accompany a husband to his, or doing far more than their share of daily life-support work like cleaning, cooking and social arrangements. Instead, they focused on communication: “He doesn’t listen to me.” “He doesn’t talk to me.” I found, as Hacker observed years before, that most wives want their husbands to be, first and foremost, conversational partners, but few husbands share this expectation of their wives.

In short, the image that best represents the current crisis is the stereotypical cartoon scene of a man sitting at the breakfast table with a newspaper held up in front of his face, while a woman glares at the back of it, wanting to talk.

**26. What is most wives' main expectation of their husbands?**

- [ A ] Talking to them.
- [ B ] Trusting them.
- [ C ] Supporting their careers.
- [ D ] Sharing housework.

27. Judging from the context, the phrase “wreaking havoc” ( Para. 2 ) most probably means .

- [ A ] generating motivation                      [ B ] exerting influence  
[ C ] causing damage                          [ D ] creating pressure

28. All of the followings are true EXCEPT \_\_\_\_\_.

- [A] men tend to talk more in public than women
- [B] nearly 50 percent of recent divorces are caused by failed conversation
- [C] women attach much importance to communication between couples
- [D] a female tends to be more talkative at home than her spouse

29. Which of the following can best summarize the main idea of this text?

- [A] The moral decaying deserves more research by sociologists.
- [B] Marriage break-up stems from sex inequalities.
- [C] Husband and wife have different expectations from their marriage.
- [D] Conversational patterns between man and wife are different.

30. In the following part immediately after this text, the author will most probably focus on \_\_\_\_\_.

- [ A ] a vivid account of the new book *Divorce Talk*
- [ B ] a detailed description of the stereotypical cartoon
- [ C ] other possible reasons for a high divorce rate in the U.S.
- [ D ] a brief introduction to the political scientist Andrew Hacker

### Text 3

Over the past decade, many companies had perfected the art of creating automatic behaviors – habits – among consumers. These habits have helped companies earn billions of dollars when customers eat snacks or wipe counters almost without thinking, often in response to a carefully designed set of daily cues.

“There are fundamental public health problems, like dirty hands instead of a soap habit, that remain killers only because we can’t figure out how to change people’s habits,” said Dr. Curtis, the director of the Hygiene Center at the London School of Hygiene & Tropical Medicine. “We wanted to learn from private industry how to create new behaviors that happen automatically.”

The companies that Dr. Curtis turned to – Procter & Gamble, Colgate-Palmolive and Unilever – had invested hundreds of millions of dollars finding the subtle cues in consumers’ lives that corporations could use to introduce new routines.

If you look hard enough, you’ll find that many of the products we use every day – chewing gums, skin moisturizers, disinfecting wipes, air fresheners, water purifiers, health snacks, teeth whiteners, fabric softeners, vitamins – are results of manufactured habits. A century ago, few people regularly brushed their teeth multiple times a day. Today, because of shrewd advertising and public health campaigns, many Americans habitually give their pearly whites a cavity-preventing scrub twice a day, often with Colgate, Crest or one of the other brands.

A few decades ago, many people didn’t drink water outside of a meal. Then beverage companies started bottling the production of far-off springs, and now office workers unthinkingly sip bottled water all day long. Chewing gum, once bought primarily by adolescent boys, is now featured in commercials as a breath freshener and teeth cleanser for use after a meal. Skin moisturizers are advertised as part of morning beauty rituals, slipped in between hair brushing and putting on make-up.

“Our products succeed when they become part of daily or weekly patterns,” said Carol Berning, a consumer psychologist who recently retired from Procter & Gamble, the company that sold \$ 76 billion of Tide, Crest and other products last year. “Creating positive habits is a huge part

of improving our consumers' lives, and it's essential to making new products commercially viable."

Through experiments and observation, social scientists like Dr. Berning have learned that there is power in tying certain behaviors to habitual cues through ruthless advertising. As this new science of habit has emerged, controversies have erupted when the tactics have been used to sell questionable beauty creams or unhealthy foods.

**31. According to Dr. Curtis, habits like hand washing with soap \_\_\_\_\_.**

- [ A ] should be further cultivated
- [ B ] should be changed gradually
- [ C ] are deeply rooted in history
- [ D ] are basically private concerns

**32. Bottled water, chewing gum and skin moisturizers are mentioned in Paragraph 5 so as to \_\_\_\_\_.**

- [ A ] reveal their impact on people's habits
- [ B ] show the urgent need of daily necessities
- [ C ] indicate their effect on people's buying power
- [ D ] manifest the significant role of good habits

**33. Which of the following does NOT belong to products that help create people's habits?**

- [ A ] Tide.
- [ B ] Crest.
- [ C ] Colgate.
- [ D ] Unilever.

**34. From the text we know that some of consumers' habits are developed due to \_\_\_\_\_.**

- [ A ] perfected art of products
- [ B ] automatic behavior creation
- [ C ] commercial promotions
- [ D ] scientific experiments

**35. The author's attitude toward the influence of advertisement on people's habits is \_\_\_\_\_.**

- [ A ] indifferent
- [ B ] negative
- [ C ] positive
- [ D ] biased

#### Text 4

Many Americans regard the jury system as a concrete expression of crucial democratic values, including the principles that all citizens who meet minimal qualifications of age and literacy are equally competent to serve on juries; that jurors should be selected randomly from a representative cross section of the community; that no citizen should be denied the right to serve on a jury on account of race, religion, sex, or national origin; that defendants are entitled to trial by their peers; and that verdicts should represent the conscience of the community and not just the letter of the

law. The jury is also said to be the best surviving example of direct rather than representative democracy. In a direct democracy, citizens take turns governing themselves, rather than electing representatives to govern for them.

But as recently as in 1968, jury selection procedures conflicted with these democratic ideals. In some states, for example, jury duty was limited to persons of supposedly superior intelligence, education, and moral character. Although the Supreme Court of the United States had prohibited intentional racial discrimination in jury selection as early as the 1880 case of *Strauder v. West Virginia*, the practice of selecting so-called elite or blue-ribbon juries provided a convenient way around this and other antidiscrimination laws.

The system also failed to regularly include women on juries until the mid-20th century. Although women first served on state juries in Utah in 1898, it was not until the 1940s that a majority of states made women eligible for jury duty. Even then several states automatically exempted women from jury duty unless they personally asked to have their names included on the jury list. This practice was justified by the claim that women were needed at home, and it kept juries unrepresentative of women through the 1960s.

In 1968, the Congress of the United States passed the Jury Selection and Service Act, ushering in a new era of democratic reforms for the jury. This law abolished special educational requirements for federal jurors and required them to be selected at random from a cross section of the entire community. In the landmark 1975 decision *Taylor v. Louisiana*, the Supreme Court extended the requirement that juries be representative of all parts of the community to the state level. The *Taylor* decision also declared sex discrimination in jury selection to be unconstitutional and ordered states to use the same procedures for selecting male and female jurors.

**36. From the principles of the US jury system, we learn that \_\_\_\_\_.**

- [ A ] both literate and illiterate people can serve on juries
- [ B ] defendants are immune from trial by their peers
- [ C ] no age limit should be imposed for jury service
- [ D ] judgment should consider the opinion of the public

**37. The practice of selecting so-called elite jurors prior to 1968 showed \_\_\_\_\_.**

- [ A ] the inadequacy of antidiscrimination laws
- [ B ] the prevalent discrimination against certain races
- [ C ] the conflicting ideals in jury selection procedures
- [ D ] the arrogance common among the Supreme Court judges

38. Even in the 1960s, women were seldom on the jury list in some states because \_\_\_\_\_.  
 [ A ] they were automatically banned by state laws  
 [ B ] they fell far short of the required qualifications  
 [ C ] they were supposed to perform domestic duties  
 [ D ] they tended to evade public engagement
39. After the Jury Selection and Service Act was passed, \_\_\_\_\_.  
 [ A ] sex discrimination in jury selection was unconstitutional and had to be abolished  
 [ B ] educational requirements became less rigid in the selection of federal jurors  
 [ C ] jurors at the state level ought to be representative of the entire community  
 [ D ] states ought to conform to the federal court in reforming the jury system
40. In discussing the U.S. jury system, the text centers on \_\_\_\_\_.  
 [ A ] its nature and problems [ B ] its characteristics and tradition  
 [ C ] its problems and their solutions [ D ] its tradition and development

### Copying Birds May Save Aircraft Fuel

Both Boeing and Airbus have trumpeted the efficiency of their newest aircraft, the 787 and A350 respectively. Their clever designs and lightweight composites certainly make a difference. But a group of researchers at Stanford University, led by Ilan Kroo, has suggested that airlines could take a more naturalistic approach to cutting jet-fuel use, and it would not require them to buy new aircraft.

The answer, says Dr Kroo, lies with birds. Since 1914, scientists have known that birds flying in formation – a V-shape – expend less energy. The air flowing over a bird's wings curls upwards behind the wingtips, a phenomenon known as upwash. Other birds flying in the upwash experience reduced drag, and spend less energy propelling themselves. Peter Lissaman, an aeronautics expert who was formerly at Caltech and the University of Southern California, has suggested that a formation

of 25 birds might enjoy a range increase of 71%.

When applied to aircraft, the principles are not substantially different. Dr Kroo and his team modelled what would happen if three passenger jets departing from Los Angeles, San Francisco and Las Vegas were to assemble over Utah, assume an inverted V-formation, occasionally change places so all could have a turn in the most favourable positions, and proceed to London. They found that the aircraft consumed as much as 15% less fuel (coupled with a reduction in carbon-dioxide output). Nitrogen-oxide emissions during the cruising portions of the flight fell by around a quarter.

There are, of course, knots to be worked out. One consideration is safety, or at least the perception of it. Would passengers feel comfortable travelling in companion? Dr Kroo points out that the aircraft could be separated by several nautical miles, and would not be in the intimate groupings favoured by display teams like the Red Arrows. A passenger peering out of the window might not even see the other planes. Whether the separation distances involved would satisfy air-traffic-control regulations is another matter, although a working group at the International Civil Aviation Organisation has included the possibility of formation flying in a blueprint for new operational guidelines.

It remains to be seen how weather conditions affect the air flows that make formation flight more efficient. In zones of increased turbulence, the planes' wakes will decay more quickly and the effect will diminish. Dr Kroo says this is one of the areas his team will investigate further. It might also be hard for airlines to co-ordinate the departure times and destinations of passenger aircraft in a way that would allow them to gain from formation flight. Cargo aircraft, in contrast, might be easier to re-schedule, as might routine military flights.

As it happens, America's armed forces are on the case already. Earlier this year the country's Defence Advanced Research Projects Agency announced plans to pay Boeing to investigate formation flight, though the programme has yet to begin. There are reports that some military aircraft flew in formation when they were low on fuel during the Second World War, but Dr Lissaman says they are unsubstantiated. "My father was an RAF pilot and my cousin the skipper of a Lancaster lost over Berlin," he adds. So he should know.

- 41. Findings of the Stanford University researchers will promote the sales of new Boeing and Airbus aircraft.**
- 42. The upwash experience may save propelling energy as well as reducing resistance.**
- 43. Formation flight is more comfortable because passengers can not see the other planes.**
- 44. The role that weather plays in formation flight has not yet been clearly defined.**
- 45. It has been documented that during World War II, America's armed forces once tried**

formation flight to save fuel.

### Section III Translation

Translate the following text from English into Chinese. Write your translation on ANSWER SHEET 2. (15 points)

“Sustainability” has become a popular word these days, but to Ted Ning, the concept will always have personal meaning. Having endured a painful period of unsustainability in his own life made it clear to him that sustainability-oriented values must be expressed through everyday action and choice.

Ning recalls spending a confusing year in the late 1990s selling insurance. He’d been through the dot-com boom and bust and, desperate for a job, signed on with a Boulder agency.

It didn’t go well. “It was a really bad move because that’s not my passion,” says Ning, whose dilemma about the job translated, predictably, into a lack of sales. “I was miserable. I had so much anxiety that I would wake up in the middle of the night and stare at the ceiling. I had no money and needed the job. Everyone said, ‘Just wait, you’ll turn the corner, give it some time.’”

### Section IV Writing

#### Part A

#### 47. Directions:

You have just come back from the U.S. as a member of a Sino-American cultural exchange program. Write a letter to your American colleague to

- 1) express your thanks for his/her warm reception;
- 2) welcome him/her to visit China in due course.

You should write about 100 words on ANSWER SHEET 2.

**Do not** sign your own name at the end of the letter. Use “Zhang Wei” instead.

**Do not** write your address. (10 points)

## Part B

### 48. Directions:

In this section, you are asked to write an essay based on the following chart. In your writing, you should

- 1) interpret the chart and
- 2) give your comments.

You should write at least 150 words.

Write your essay on ANSWER SHEET 2. (15 points)

## 2009 年全国硕士研究生入学统一考试英语(二)试题

### Section I Use of English

#### Directions:

Read the following text. Choose the best word(s) for each numbered blank and mark A, B, C or D on ANSWER SHEET 1. (10 points)

In 1999, the price of oil hovered around \$ 16 a barrel. By 2008, it had 1 the \$ 100 a barrel mark. The reasons for the surge 2 from the dramatic growth of the economies of China and India to widespread 3 in oil-producing regions, including Iraq and Nigeria's delta region. Triple-digit oil prices have 4 the economic and political map of the world, 5 some old notions of power. Oil-rich nations are enjoying historic gains and opportunities, 6 major importers – including China and India, home to a third of the world's population – 7 rising economic and social costs.

Managing this new order is fast becoming a central 8 of global politics. Countries that need oil are clawing at each other to 9 scarce supplies, and are willing to deal with any government, 10 how unpleasant, to do it.

In many poor nations with oil, the profits are being, lost to corruption, 11 these countries of their best hope for development. And oil is fueling enormous investment funds run by foreign governments, 12 some in the west see as a new threat.

Countries like Russia, Venezuela and Iran are well supplied with rising oil 13, a change reflected in newly aggressive foreign policies. But some unexpected countries are reaping benefits, 14 costs, from higher prices. Consider Germany. 15 it imports virtually all its oil, it has prospered from extensive trade with a booming Russia and the Middle East. German exports to Russia 16 128 percent from 2001 to 2006.

In the United States, as already high gas prices rose 17 higher in the spring of 2008, the issue cropped up in the presidential campaign, with Senators McCain and Obama 18 for a federal gas tax holiday during the peak summer driving months. And driving habits began to 19, as

sales of small cars jumped and mass transport systems 20 the country reported a sharp increase in riders.

## Section II Reading Comprehension

### Part A

#### Directions:

Read the following four texts. Answer the questions below each text by choosing A, B, C or D. Mark your answers on ANSWER SHEET 1. (40 points)

### Text 1

Henric Ibsen, author of the play *A Doll's House*, in which a pretty, helpless housewife abandons her husband and children to seek a more serious life, would surely have approved. From January 1st, 2008, all public companies in Norway are obliged to ensure that at least 40% of their board directors are women. Most firms have obeyed the law, which was passed in 2003. But about 75 out of the 480 or so companies it affects are still too male for the government's liking. They will shortly receive a letter informing them that they have until the end of February to act, or face the legal consequences – which could include being dissolved.

Before the law was proposed, about 7% of board members in Norway were female, according to the Centre for Corporate Diversity. The number has since jumped to 36%. That is far higher than the average of 9% for big companies across Europe or America's 15% for the Fortune 500. Norway's stock exchange and its main business lobby oppose the law, as do many businessmen. "I am against quotas for women or men as a matter of principle," says Sverre Munck, head of international operations at a media firm. "Board members of public companies should be chosen solely on the basis of merit and experience," he says. Several firms have even given up their public status in order to escape the new law.

Companies have had to recruit about 1,000 women in four years. Many complain that it has been difficult to find experienced candidates. Because of this, some of the best women have collected as many as 25-35 directorships each, and are known in Norwegian business circles as the "golden skirts". One reason for the scarcity is that there are fairly few women in management in Norwegian companies – they occupy around 15% of senior positions. It has been particularly hard for firms in the oil, technology and financial industries to find women with a enough experience.

Some people worry that their relative lack of experience may keep women quiet on boards, and that in turn could mean that boards might become less able to hold managers to account. Recent history in Norway, however, suggests that the right women can make strong directors. "Women feel more compelled than men to do their homework," says Ms Reksten Skaugen, who was voted Norway's chairman of the year for 2007, "and we can afford to ask the hard questions, because women are not always expected to know the answers."

**21. The author mentions Ibsen's play in the first paragraph in order to \_\_\_\_\_.**

- [ A ] depict women's dilemma at work
- [ B ] explain the newly passed law
- [ C ] support Norwegian government

- [D] introduce the topic under discussion
22. **A public company that fails to obey the new law could be forced to \_\_\_\_\_.**
- [A] pay a heavy fine
- [B] close down its business
- [C] change to a private business
- [D] sign a document promising to act
23. **To which of the following is Sverre Munck most likely to agree?**
- [A] A set ratio of women in a board is unreasonable.
- [B] A reasonable quota for women at work needs to be set.
- [C] A common principle should be followed by all companies.
- [D] An inexperienced businessman is not subject to the new law.
24. **The author attributes the phenomenon of “golden skirts” to \_\_\_\_\_.**
- [A] the small number of qualified females in management
- [B] the over-recruitment of female managers in public companies
- [C] the advantage women enjoy when competing for senior positions
- [D] the discrimination toward women in Norwegian business circles
25. **The main idea of the passage might be \_\_\_\_\_.**
- [A] female power and liberation in Norway
- [B] the significance of Henric Ibsen’s play
- [C] women’s status in Norwegian firms
- [D] the constitution of board members in Norway

## Text 2

While there’s never a good age to get cancer, people in their 20s and 30s can feel particularly isolated. The average age of a cancer patient at diagnosis is 67. Children with cancer often are treated at pediatric(小儿科的) cancer centers, but young adults have a tough time finding peers, often sitting side-by-side during treatments with people who could be their grandparents.

In her new book *Crazy Sexy Cancer Tips*, writer Kris Carr looks at cancer from the perspective of a young adult who confronts death just as she’s discovering life. Ms. Carr was 31 when she was diagnosed with a rare form of cancer that had generated tumors on her liver and lungs.

Ms. Carr reacted with the normal feelings of shock and sadness. She called her parents and stocked up on organic food, determined to become a “full-time healing addict.” Then she picked up

the phone and called everyone in her address book, asking if they knew other young women with cancer. The result was her own personal “cancer posse”: a rock concert tour manager, a model, a fashion magazine editor, a cartoonist and a MTV celebrity, to name a few. This club of “cancer babes” offered support, advice and fashion tips, among other things.

Ms. Carr put her cancer experience in a recent Learning Channel documentary, and she has written a practical guide about how she coped. Cancer isn’t funny, but Ms. Carr often is. She swears, she makes up names for the people who treat her (Dr. Fabulous and Dr. Guru), and she even makes second sound fun (“cancer road trips”, she calls them).

She leaves the medical advice to doctors, instead offering insightful and practical tips that reflect the world view of a young adult. “I refused to let cancer ruin my party,” she writes. “There are just too many cool things to do and plan and live for.”

Ms. Carr still has cancer, but it has stopped progressing. Her cancer tips include using time-saving mass e-mails to keep friends informed, sewing or buying fashionable hospital gowns so you’re not stuck with regulation blue or gray and playing Gloria Gaynor’s “I Will Survive” so loud your neighbors call the police. Ms. Carr also advises an eyebrow wax and a new outfit before you tell the important people in your illness. “People you tell are going to cautiously and not so cautiously try to see the cancer, so dazzle them instead with your miracle,” she writes.

While her advice may sound superficial, it gets to the heart of what every cancer patient wants: the chance to live life just as she always did, and maybe better.

**26. Which of the following groups is more vulnerable to cancer?**

- [ A ] Children.
- [ B ] People in their 20s and 30s.
- [ C ] Young adults.
- [ D ] Elderly people.

**27. All of the following statements are true EXCEPT \_\_\_\_\_.**

- [ A ] Kris Carr is a female writer
- [ B ] Kris Carr is more than 31-year-old
- [ C ] Kris Carr works in a cancer center
- [ D ] Kris Carr is very optimistic

**28. The phrase “cancer posse” (Line 4, Para.3) probably refers to \_\_\_\_\_.**

- [ A ] a cancer research organization
- [ B ] a group of people who suffer from cancer

[C] people who have recovered from cancer

[D] people who cope with cancer

29. **Kris Carr makes up names for the people who treat her because \_\_\_\_\_.**

[A] she is depressed and likes swearing

[B] she is funny and likes playing jokes on doctor

[C] she wants to leave the medical advice to doctor

[D] she tries to leave a good impression on doctor

30. **From Kris Carr's cancer tips we may infer that \_\_\_\_\_.**

[A] she learned to use e-mails after she got cancer

[B] she wears fashionable dress even after suffering from cancer

[C] hospital gowns for cancer patients are usually not in bright colors

[D] the neighbors are very friendly with cancer patients

### Text 3

Should a leader strive to be loved or feared? This question, famously posed by Machiavelli, lies at the heart of Joseph Nye's new book. Mr. Nye, a former dean of the Kennedy School of Government at Harvard and one-time chairman of America's National Intelligence Council, is best known for promoting the idea of "soft power", based on persuasion and influence, as a counterpoint to "hard power", based on coercion(强迫) and force.

Having analyzed the use of soft and hard power in politics and diplomacy in his previous books, Mr. Nye has now turned his attention to the relationship between power and leadership, in both the political and business spheres. Machiavelli, he notes, concluded that "one ought to be both feared and loved, but as it is difficult for the two to go together, it is much safer to be feared than loved." In short, hard power is preferable to soft power. But modern leadership theorists have come to the opposite conclusion.

The context of leadership is changing, they observe, and the historical emphasis on hard power is becoming outdated. In modern companies and democracies, power is increasingly diffused and traditional hierarchies(等级制) are being undermined, making soft power ever more important. But that does not mean coercion should now take a back seat to persuasion. Mr. Nye argues. Instead, he advocates a synthesis of these two views. The conclusion of *The Powers to Lead*, his survey of the theory of leadership, is that a combination of hard and soft power, which he calls "smart power", is the best approach.

The dominant theoretical model of leadership at the moment is, apparently, the “transformational leadership pattern”. Anyone allergic (反感) to management term will already be running for the exit, but Mr. Nye has performed a valuable service in rounding up and summarizing the various academic studies and theories of leadership into a single, slim volume. He examines different approaches to leadership, the morality of leadership and how the wider context can determine the effectiveness of a particular leader. There are plenty of anecdotes and examples, both historical and contemporary, political and corporate.

Alas, leadership is a slippery subject, and as he depicts various theories, even Mr. Nye never quite nails the jelly to the wall. He is at his most interesting when discussing the moral aspects of leadership – in particular, the question of whether it is sometimes necessary for good leaders to lie – and he provides a helpful 12-point summary of his conclusions. A recurring theme is that as circumstances change, different sorts of leaders are required; a leader who thrives in one environment may struggle in another, and vice versa. Ultimately that is just a fancy way of saying that leadership offers no easy answers.

**31. From the first two paragraphs we may learn that Mr. Machiavelli's idea of hard power is \_\_\_\_\_.**

- [ A ] well accepted by Joseph Nye
- [ B ] very influential till nowadays
- [ C ] based on sound theories
- [ D ] contrary to that of modern leadership theorists

**32. Which of the following makes soft power more important today according to Mr. Nye?**

- [ A ] Coercion is widespread.
- [ B ] Morality is devalued.
- [ C ] Power is no longer concentrated.
- [ D ] Traditional hierarchies are strengthened

**33. In his book *The Powers to Lead*, Mr. Nye has examined all the following aspects of leadership EXCEPT \_\_\_\_\_.**

- [ A ] authority
- [ B ] context
- [ C ] approaches
- [ D ] morality

**34. Mr. Nye's book is particularly valuable in that it \_\_\_\_\_.**

- [ A ] makes little use of management terms
- [ B ] summarizes various studies concisely
- [ C ] serves as an exit for leadership researchers

[ D ] sets a model for contemporary corporate leaders

35. According to the author, the most interesting part of Mr. Nye's book lies in his \_\_\_\_\_.

[ A ] view of changeable leadership

[ B ] definition of good leadership

[ C ] summary of leadership history

[ D ] discussion of moral leadership

#### Text 4

Americans don't like to lose wars. Of course, a lot depends on how you define just what a war is. There are shooting wars – the kind that test patriotism and courage – and those are the kind at which the U.S. excels. But other struggles test those qualities too. What else was the Great Depression or the space race or the construction of the railroads? If American indulge in a bit of flag-waving when the job is done, they earned it.

Now there is a similar challenge: global warming. The steady deterioration (恶化) of the very climate of this very planet is becoming a war of the first order, and by any measure, the U.S. is losing. Indeed, if America is fighting at all, it's fighting on the wrong side. The U.S. produces nearly a quarter of the world's greenhouse gases each year and has stubbornly made it clear that it doesn't intend to do a whole lot about it. Although 174 nations approved the admittedly flawed Kyoto accords to reduce carbon levels, the U.S. walked away from them. There are vague promises of manufacturing fuel from herbs or powering cars with hydrogen. But for a country that tightly cites patriotism as one of its core values, the U.S. is taking a pass on what might be the most patriotic struggle of all. It's hard to imagine a bigger fight than one for the survival of a country's coasts and farms, the health of its people and stability of its economy.

There is, if the vast majority of people increasingly agree that climate change is a global emergency, there's far less agreement on how to fix it. Industry offers its plans, which too often would fix little. Environmentalists offer theirs, which too often amount to native wish lists that could weaken American's growth. But let's assume that those interested parties and others will always be at the table and will always demand that their voices be heard and that their needs be addressed. What would an aggressive, ambitious, effective plan look like – one that would leave the U.S. both environmentally safe and economically sound?

Halting climate change will be far harder. One of the more conservative plans for addressing the

problem calls for a reduction of 25 billion tons of carbon emissions over the next 52 year. And yet by devising a consistent strategy that mixes short-term solutions with far-sighted goals, combines government activism with private-sector enterprise and blends pragmatism(实用主义) with ambition, the U.S. can, without major damage to the economy, help halt the worst effects of climate change and ensure the survival of its way of life for future generations. Money will do some of the work, but what's needed most is will. "I'm not saying the challenge isn't almost overwhelming," says Fred Krupp. "But this is America, and America has risen to these challenges before."

**36. What does the passage mainly discuss?**

- [ A ] Human wars.
- [ B ] Economic crisis.
- [ C ] America's environmental policies.
- [ D ] Global environment in general.

**37. From the last sentence of paragraph 2 we may learn that the survival of a country's coasts and farms, the health of its people and the stability of its economy is \_\_\_\_\_.**

- [ A ] of utmost importance
- [ B ] a fight no one can win
- [ C ] beyond people's imagination
- [ D ] a less significant issue

**38. Judging from the context, the word "rub" (Line 1, Para.3) probably means \_\_\_\_\_.**

- [ A ] friction
- [ B ] contradiction
- [ C ] conflict
- [ D ] problem

**39. What is the author's attitude toward America's policies on global warming?**

- [ A ] Critical
- [ B ] Indifferent
- [ C ] Supportive
- [ D ] Compromising

**40. The paragraphs immediately following this passage would most probably deal with \_\_\_\_\_.**

- [ A ] the new book written by Fred Krupp
- [ B ] how America can fight against global warming
- [ C ] the harmful effects of global warming
- [ D ] how America can tide over economic crisis

## Part B

### Directions:

Read the following text and answer questions by finding a subtitle for each of the marked parts

or paragraphs. There are two extra items in the subtitles. Mark your answers on ANSWER SHEET

1. (10 points)

- [A] Follow on lines
- [B] Whisper: Keep It to Yourself
- [C] Word of Experience: Stick to It
- [D] Code of Success: Freed and Targeted
- [E] Efficient Work to Promote Efficient Workers
- [F] Recipe: Simplicity Means Everything
- [G] Efficiency Comes from Orders

Every decade has its defining self-help business book. In the 1940s it was *How to Win Friends and Influence People*, in the 1990s *The Seven Habits of Highly Successful People*. These days we're worried about something much simpler: *Getting Things Done*

(41) \_\_\_\_\_

That's the title of productivity guru David Allen's pithy 2001 treatise on working efficiently, which continues to resonate in this decade's overworked, overwhelmed, overteched workplace. Allen hasn't just sold 500,000 copies of his book. He has preached his message of focus, discipline and creativity everywhere from Sony and Novartis to the World Bank and the U.S. Air Force. He counsels swamped chief executives on coping with information overload. He ministers to some clients with an intensive, two-day, \$6,000 private session in which he and his team organize their lives from top to bottom. And he has won the devotions of acolytes who document on their blogs how his *Getting Things Done* (GTD) program has changed their lives.

(42) \_\_\_\_\_

Allen admits that much of his basic recipe is common sense. Free your mind, and productivity will follow. Break down projects and goals into discrete, definable actions, and you won't be bothered by all those loose threads pulling at your attention. First make decisions about what needs to get done, and then fashion a plan for doing it. If you've catalogued everything you have to do and all your long-term goals, Allen says, you're less likely to wake up at 3 a.m. worrying about whether you've forgotten something: "Most people haven't realized how out of control their head is when they get 300 e-mails a day and each of them has potential meaning."

(43) \_\_\_\_\_

When e-mails, phones calls and to-do lists are truly under control, Allen says, the real change

begins. You will finally be able to use your mind to dream up great ideas and enjoy your life rather than just occupy it with all the things you've got to do. Allen himself, despite running a \$ 5.5 million consulting practice, traveling 200 days a year and juggling a business that's growing 40% every years, finds time to joyride in his Mini Cooper and sculpt bonsai plants. Oh, and he had earned his black belt in karate.

(44) \_\_\_\_\_

Few companies have embraced Allen's philosophy as thoroughly as General Mills, the Minnesota-based maker of Cheerios and Lucky Charms. Allen began at the company with a couple of private coaching sessions for top executives, who raved about his guidance. Allen and his staff now hold six to eight two-day training sessions a year. The company has already put more than 2,000 employees through GTD training and plans to expand it company-wide. "Fads come and go," says Kevin Wilde, General Mills' CEO, "but this continuous to work."

(45) \_\_\_\_\_

The most fevered followers of Allen's organizational methodology gather online. Websites like gt-dindex. marvelz.com parse Allen's every utterance. The 43 Folders blog ran an eight-part pod-cast interview with him. GTD enthusiasts like Frank Meeuwsen, on whatsthenextaction.com gather best practice techniques for implementing the book's ideas. More than 60 software tools have been built specifically to supplement Allen's system.

### Section III Translation

#### 46. Directions:

Translate the following text from English into Chinese. Write your translation on ANSWER SHEET 2. (15 points)

With the nation's financial system teetering on a cliff, the compensation arrangements for executives of the big banks and other financial firms are coming under close examination again.

Bankers' excessive risk-taking is a significant cause of this financial crisis and has contributed to others in the past. In this case, it was fueled by low interest rates and kept going by a false sense of security created by a debt-fueled bubble in the economy.

Mortgage lenders gladly lent enormous sums to those who could not afford to pay them back, dividing the loans and selling them off to the next financial institution along the chain, which took ad-

vantage of the same high-tech securitization to load on more risky mortgage-based assets.

Financial regulation will have to catch up with the most irresponsible practices that led banks down in this road, in hopes of averting the next crisis, which is likely to involve different financial techniques and different sorts of assets. But it is worth examining the root problem of compensation schemes that are tied to short-term profits and revenues, and thus encourage bankers to take irresponsible level of risk.

## Section IV Writing

### Part A

#### 47. Directions:

Write an e-mail of about 100 words to a foreign teacher in your college, inviting him/her to be a judge for the upcoming English speech contest.

You should include the details you think necessary.

You should write neatly on the ANSWER SHEET 2.

**Do not** sign your own name at the end of the e-mail. Use “Li Ming” instead.

**Do not** write the address. (10 points)

### Part B

#### 48. Directions:

It is known that text message has both advantages and disadvantages. Some people think it is a blessing, while others regard it as a hell. In this section, you are asked to write an essay on text message. You can take either stand and provide specific reasons and examples to support your idea. You should write at least 150 words on the ANSWER SHEET 2. (15 points)
